Altruism And Christian Ethics:

Altruism and Christian Ethics Colin Grant, 2000-11-16 Separated from its anchorage in religion ethics has followed the social sciences in seeing human beings as fundamentally characterised by self interest so that altruism is either naively idealistic or arrogantly self sufficient Colin Grant contends that as a modern secular concept altruism is a parody on the self giving love of Christianity so that its dismissal represents a social levelling that loses the depths that theology makes intelligible and religion makes possible The Christian affirmation is that God is characterised by self giving love agape then expected of Christians Lacking this theological background the focus on self interest in sociobiology and economics and on human realism in the political focus of John Rawls or the feminist sociability of Carol Gilligan finds altruism naive or a dangerous distraction from real possibilities of mutual support This book argues that to dispense with altruism is to dispense with God and with the divine transformation of human possibilities

The Evolution of Altruism and the Ordering of Love Stephen J. Pope, 1995-04-01 In this book Stephen J Pope argues that contemporary scientifically based theories of the evolution of altruism provide important insights into one of the fundamental moral problems of Christian ethics the natural basis of love and its ordering He explores the contributions evolutionary theory makes to our understanding of the biological foundations of kin preference and reciprocal care the limits of love and the need for an ordering of love issues relevant to any ethic that accords a central role to the deeply natural affections found in friendship marriage and the family He proposes that understanding human nature in its broader evolutionary context brings to ethics a needed balance between the personal and biological dimensions of human nature In the context of Catholic ethics Pope points out functional similarities between Thomas Aquinas's use of then available scientific theories in his interpretation of the natural basis of primary relationships and Pope's own efforts to avoid the deficiencies that characterize contemporary Catholic interpretations of love based on personalism and existentialism He concludes with a call for a multidimensional interpretation of love one that incorporates scientifically based theories about human nature together with an appreciation of the significance of motives intentions and freedom for the ordering of human affections and moral responsibility This book will be of interest to moral theologians especially those concerned with the topics of love justice and natural law ethics

Selfish Genes and Christian Ethics Neil Messer, 2007-03-30 The evolutionary origins of human beings and in particular the origins of human morality have always attracted debate and speculation not just in the academic community but in popular science and the wider general population as well The arguments and explanations put forward over the years seem to thoroughly catch the popular imagination but there is the danger that these explanations tend to step outside the bounds of scientific theory and become powerful popular myths instead In Neil Messer's *Selfish Genes and Christian Ethics* the author is challenging this tendency Instead he provides a Christian theological anthropology which among other things aims to give Christians and the churches the confidence to engage with assumptions that evolutionary theory and religious beliefs are untenable This is a valuable

resource for anyone engaged in the study of theology providing the reader with the ability to consider both the theoretical and the practical questions raised by evolutionary discussions of ethics and morality *Patterns of Care* Eva-Lotta

Grantén,2003 **Effective Altruism and Religion** Dominic Roser,Stefan Riedener,Markus Huppenbauer,2022-01-04 A new movement is on the scene effective altruism the combination of love and efficiency making the world a better place not just with a bleeding heart and empathy but with a radical focus on reason and evidence and never losing sight of the goal of maximal impact Its adherents typically stem from strongly secular environments such as elite philosophy departments or Silicon Valley So far a religious perspective on this movement has been lacking What can people of faith learn from effective altruism how can they contribute and what must they criticise This volume offers a first examination of these questions providing both a Buddhist and an Orthodox Jewish perspective on them in addition to various Christian contributions

Human Dependency and Christian Ethics Sandra Sullivan-Dunbar,2017-10-05 This book engages Christian love theologies feminist economics and political theory to identify elements of a Christian ethic of dependent care relations

Christian Ethics and the Moral Psychologies Don S. Browning,2006-05-17 Interest in psychology permeates our culture with psychological solutions advanced for a host of moral dilemmas How should ethically minded Christians include insights from such disciplines as psychoanalysis cognitive moral development and neuroscience in their theological reflection Don Browning offers a serious proposal for combining these disciplines with the best in ethical reflection from a Christian standpoint Along the way he introduces readers to the moral psychology work of Sigmund Freud Carol Gilligan Antonio Damasio and others opening up a dialogue between their work and the hermeneutics of Hans Georg Gadamer and Paul Ricoeur Browning also recognizes the potential limits of the conversation between Christian ethics and the moral psychologies pointing out where they must diverge **Moral Passion and Christian Ethics** Robin Gill,2017-03-06 Using a

range of disciplines this book explores the relationship between moral passion and rational ethical deliberation **The Fundamentals of Bioethics: Legal Perspectives and Ethical Approaches** Scaria Kanniyakonil,2007 **Christianity and the Roots of Morality** ,2017-06-06 What is the role of religion especially Christianity in morality pro social behavior and altruism Are there innate human moral capacities in the human mind When and how did they appear in the history of evolution What is the real significance of Jesus teaching in the Sermon on the Mount does it set up unique moral standards or only crystallize humans innate moral intuitions What is the role of religious teachings and religious communities in pro social behavior Christianity and the Roots of Morality Philosophical Early Christian and Empirical Perspectives casts light on these questions through interdisciplinary articles by scholars from social sciences cognitive science social psychology sociology of religion philosophy systematic theology comparative religion and biblical studies Contributors include Nancy T Ammerman Istv n Czachesz Grace Davie Jutta Jokiranta Simo Knuuttila Kristen Monroe Mika Ojakangas Sami Pihlstr m Antti Raunio Heikki R is nen Risto Saarinen Kari Syreeni Lauri Thur n Petri Ylikoski **Love and Christian Ethics** Frederick V.

Simmons, Brian Sorrells, 2016 At the heart of Christian ethics is the biblical commandment to love God and to love one's neighbor as oneself. But what is the meaning of love? Scholars have wrestled with this question since the recording of the Christian gospels and in recent decades teachers and students of Christian ethics have engaged in vigorous debates about appropriate interpretations and implications of this critical norm. In *Love and Christian Ethics* nearly two dozen leading experts analyze and assess the meaning of love from a wide range of perspectives. Chapters are organized into three areas: influential sources and exponents of Western Christian thought about the ethical significance of love; perennial theoretical questions attending that consideration and the implications of Christian love for important social realities. Contributors bring a richness of thought and experience to deliver unprecedentedly broad and rigorous analysis of this central tenet of Christian ethics and faith. William Werpehowski provides an afterword on future trajectories for this research. *Love and Christian Ethics* is sure to become a benchmark resource in the field.

Altruism and Altruistic Love Stephen G. Post, Lynn G.

Underwood, Jeffrey P. Schloss, William B. Hurlbut, 2002-03-28 The concept of altruism or disinterested concern for another's welfare has been discussed by everyone from theologians to psychologists to biologists. In this cutting edge book evolutionary, neurological, developmental, psychological, social, cultural, and religious aspects of altruistic behavior are examined by renowned researchers. The result is a collaborative and provocative look at one of humanity's essential and defining characteristics.

SCM Studyguide: Christian Ethics Messer Neil, 2015-04-21

Altruism in World Religions Suzanne Neusner, Bruce Chilton, 2005-11-08 In 1830 philosopher Auguste Comte coined the term altruism to provide a general definition for the act of selflessly caring for others. But does this modern conception of sacrificing one's own interests for the well being of others apply to the charitable behaviors encouraged by all world religions? In *Altruism in World Religions* prominent scholars from an array of religious perspectives probe the definition of altruism to determine whether it is a category that serves to advance the study of religion. Exploring a range of philosophical and religious thought from Greco-Roman *philia* to Judaism, Christianity, and Islam, from Hinduism in India to Buddhism and the religions of China and Japan, the authors find that altruism becomes problematic when applied to religious studies because it is in fact a concept absent from religion. Chapters on Judaism, Christianity, and Islam reveal that followers of these religions cannot genuinely perform self-sacrificing acts because God has promised to reward every good deed. Moreover, the separation between the self and the other that self-sacrifice necessarily implies runs counter to Buddhist thought which makes no such distinction. By challenging our assumptions about the act of self-sacrifice as it relates to religious teachings, the authors have shown altruism to be more of a secular than religious notion. At the same time, their findings highlight how charitable acts operate with the values and structures of the religions studied.

The Political Economy of Organ Transplantation Hagai Boas, 2022-09-09 This thought provoking work examines how the relationships of organs tissues and cells transferred from one body to another through donation sale or gift

are mediated by the state market and family The book is a thorough review of the sociological anthropological and ethical literature surrounding transplant organs but encased within the author's own personal dilemmas and lived experience His work skillfully underscores the negotiations and accommodations inherent in the use of these technologies and reveals the situatedness of decisions that belie any simplistic readings of the ethics of transplantations This is a stimulating and accessible book for those with an interest in transplantation ethics or the social implications of medical technologies Its strength lies in the reflexive accounts from the author of his own experience juxtaposed with the sensitive appraisals of the workings of the state market and family in the organ economy Andrea Whittaker Monash University reviewed for Social Forces This innovative work combines a rigorous academic analysis of the political economy of organ supply for transplantation with autobiographical narratives that illuminate the complex experience of being an organ recipient Organs for transplantations come from two sources living or post mortem organ donations These sources set different routes of movement from one body to another Postmortem organ donations are mainly sourced and allocated by state agencies while living organ donations are the result of informal relations between donor and recipient Each route traverses different social institutions determines discrete interaction between donor and recipient and is charged with moral meanings that can be competing and contrasting The political economy of organs for transplants is the gamut of these routes and their interconnections and this book suggests how such a political economy looks like what are its features and contours its negotiation of the roles of the state market and the family in procuring organs for transplantations and its ultimate moral justifications Drawing on Boas personal experiences of waiting searching and obtaining organs each autobiographical section of the book sheds light on a different aspect of the discussed political economy of organs post mortem donations parental donation and organ market and illustrates the experience of living with the fear of rejection and the intimidation of chronic shortage A Political Economy of Organ Transplantation is of interest to students and academics with an interest in bioethics sociology of health and illness medical anthropology and science and technology studies
