Battle of the Dinosaur Bones Rebecca L. Johnson,2012-08-01 In the 1880s science witnessed a major shift Charles Darwin proposed his theory of evolution People dug up the first dinosaur fossils And the field of paleontology the study of ancient plants and animals emerged Othniel Charles Marsh and Edward Drinker Cope became enthralled with these new ideas discoveries and developments Both were determined to become world famous paleontologists When they met in 1863 they started off as friends But within a few years competition drove the men apart Each fought bitterly to discover more fossils name more species and publish more papers than the other In their haste to outdo each other they both produced some shoddy work The resulting confusion took many years to discover and correct and their toxic relationship crippled the field of paleontology for decades afterward However the competition also produced a wealth of fossils These laid a firm foundation for the field of paleontology and supported Darwin s theory of evolution Marsh s and Cope s discoveries generated keen public interest in prehistoric life and rich data for future generations of paleontologists This book explores the great rivalry between Marsh and Cope showing how it brought out the best and the worst in them while bringing humankind a brand new view of life on Earth

Brinkman,2024-05-31 The so called Bone Wars of the 1880s which pitted Edward Drinker Cope against Othniel Charles Marsh in a frenzy of fossil collection and discovery may have marked the introduction of dinosaurs to the American public but the second Jurassic dinosaur rush which took place around the turn of the twentieth century brought the prehistoric beasts back to life These later expeditions which involved new competitors hailing from leading natural history museums in New York Chicago and Pittsburgh yielded specimens that would be reconstructed into the colossal skeletons that thrill visitors today in museum halls across the country Reconsidering the fossil speculation the museum displays and the media frenzy that ushered dinosaurs into the American public consciousness Paul Brinkman takes us back to the birth of dinomania the modern obsession with all things Jurassic Featuring engaging and colorful personalities and motivations both altruistic and ignoble The Second Jurassic Dinosaur Rush shows that these later expeditions were just as foundational if not more so to the establishment of paleontology and the budding collections of museums than the more famous Cope and Marsh treks With adventure intrigue and rivalry this is science at its most swashbuckling
