Sweet, 2004-07-21 Exploring the cultural lives of African slaves in the early colonial Portuguese world with an emphasis on the more than one million Central Africans who survived the journey to Brazil James Sweet lifts a curtain on their lives as Africans rather than as incipient Brazilians Focusing first on the cultures of Central Africa from which the slaves came Ndembu Imbangala Kongo and others Sweet identifies specific cultural rites and beliefs that survived their transplantation to the African Portuguese diaspora arguing that they did not give way to immediate creolization in the New World but remained distinctly African for some time Slaves transferred many cultural practices from their homelands to Brazil including kinship structures divination rituals judicial ordeals ritual burials dietary restrictions and secret societies Sweet demonstrates that the structures of many of these practices remained constant during this early period although the meanings of the rituals were often transformed as slaves coped with their new environment and status Religious rituals in particular became potent forms of protest against the institution of slavery and its hardships In addition Sweet examines how certain African beliefs and customs challenged and ultimately influenced Brazilian Catholicism Sweet's analysis sheds new light on African culture in Brazil's slave society while also enriching our understanding of the complex process of creolization and cultural survival

Research on cities worldwide still takes its cue from cities in Europe and the US which are seen as the standard model. However cities in the global South are undergoing a much more rapid transformation including multiple interlinked transitions with Africa featuring the highest urbanization rates world wide. Scholars therefore call for a new approach to urban studies which examines cities from a more global comparative perspective. This book discusses the new approach which pays added attention to the role that societal creativity plays in processes of urbanization instead of concentrating exclusively on expert driven planning and intervention. Especially in fast growing cities with weaker institutional capacity for interventions the interplay between intervention and invention between expert and societal agency becomes more tangible and all the more significant. Africa's religious and artistic traditions constitute a primary example of its intellectual and cultural vitality. Artistic works play a vital role especially where oral traditions dominate in communicating ideas about the relationship between the human spiritual and natural worlds. This work is a comparative study of Africa's visual and performing arts concentrating on their geographical material and gendered diversity and focusing on the relation of these arts to African religion. The author combines ethnographic and art historical methodology but does not assume any prior knowledge of African art or African religion. The text seeks a greater understanding of the philosophical and religious aspects of African art thus challenging western perceptions of what is important in terms of artistic representation.
