Collinearity-Preserving Functions between Desarguesian Planes David S. Carter, Andrew Vogt, 1980 Using concepts from valuation theory we obtain a characterization of all collinearity preserving functions from one affine or projective Desarguesian plane into another The case in which the planes are projective and the range contains a quadrangle has been treated previously in the literature Our results permit one or both planes to be affine and include cases where the range contains a triangle but no quadrangle A key theorem is that with the exception of certain embeddings defined on planes of order 2 and 3 every collinearity preserving function from one affine Desarguesian plane into another can be extended to a collinearity preserving function between enveloping projective planes

Embracing the Beat of Expression: An Mental Symphony within **Of When**

In a global used by screens and the ceaseless chatter of quick interaction, the melodic beauty and emotional symphony produced by the written term frequently fade into the background, eclipsed by the constant noise and disruptions that permeate our lives. Nevertheless, situated within the pages of **Of When** an enchanting fictional value full of natural thoughts, lies an immersive symphony waiting to be embraced. Crafted by a masterful musician of language, that fascinating masterpiece conducts readers on a mental journey, skillfully unraveling the concealed songs and profound influence resonating within each cautiously constructed phrase. Within the depths of this moving evaluation, we shall explore the book is key harmonies, analyze its enthralling publishing fashion, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
