Overcoming Our Evil Aaron Stalnaker,2006-07-26 Can people ever really change Do they ever become more ethical and if so how Overcoming Our Evil focuses on the way ethical and religious commitments are conceived and nurtured through the methodical practices that Pierre Hadot has called spiritual exercises These practices engage thought imagination and sensibility and have a significant ethical component yet aim for a broader transformation of the whole personality Going beyond recent philosophical and historical work that has focused on ancient Greco Roman philosophy Stalnaker broadens ethical inquiry into spiritual exercises by examining East Asian as well as classical Christian sources and taking religious and seemingly aesthetic practices such as prayer ritual and music more seriously as objects of study More specifically Overcoming Our Evil examines and compares the thought and practice of the early Christian Augustine of Hippo and the

early Confucian Xunzi Both have sophisticated and insightful accounts of spiritual exercises and both make such ethical work central to their religious thought and practice Yet to understand the two thinkers recommendations for cultivating virtue we must first understand some important differences Here Stalnaker disentangles the competing aspects of Augustine and Xunxi s ideas of human nature His groundbreaking comparison of their ethical vocabularies also drives a substantive analysis of fundamental issues in moral psychology especially regarding emotion and the complex idea of the will to examine how our dispositions to feel think and act might be slowly transformed over time The comparison meticulously constructs vivid portraits of both thinkers demonstrating where they connect and where they diverge making the case that both have been misunderstood and misinterpreted In throwing light on these seemingly disparate ancient figures in unexpected ways Stalnaker redirects recent debate regarding practices of personal formation and more clearly exposes the intellectual and political issues involved in the retrieval of classic ethical sources in diverse contemporary societies illuminating a path toward a contemporary understanding of difference

Managing Your Mind Gillian Butler, Tony Hope, 2007-03-08 Originally published in 1995 the first edition of *Managing Your Mind* established a unique place in the self help book market A blend of tried and true psychological counseling and no nonsense management advice grounded in the principles of CBT and other psychological treatments the book straddled two types of self help literature arguing that in one's personal and professional life the way to success is the same By adopting the practical strategies that mental health experts Butler and Hope have developed over years of clinical research and practice one can develop the mental fitness necessary to resolve one's personal and interpersonal challenges at home and work and to live a productive satisfying life The first edition addressed how to develop key skills to mental fitness e

g managing one's time better facing and solving problems better keeping things in perspective learning to relax etc how to improve one's relationships how to beat anxiety and depression and how to establish a good mind/body balance For this new edition Butler and Hope have updated all preexisting material and have added five new chapters on sexuality and intimate relationships anger in relationships recent traumatic events and their aftermath loss and bereavement and dealing with the past **Celebrating the Lectionary for Primary Grades 2010-2011** Vicki Lopez-Kaley, 2010-07-15 **Time-Limited**

Psychotherapy James Mann, 1973 Waiting lists in psychiatric clinics and increasing numbers of patients in long term psychotherapy have highlighted the need for shorter methods of treatment Existing forms of short term psychotherapy tend to be vague and uncertain lacking as they do a clearly formulated rationale and methodology The bold and challenging technique for brief psychotherapy designed around the factor of time itself which James Mann introduces here is a method he hopes will revolutionize current practice The significance of time in human life is examined in terms of the development of time sense as well as its unconscious meaning and the ways these are experienced in both the categorical and existential senses The author shows how the interplay between the regressive pressures of the child's sense of infinite time and the adult reality of categorical time determine the patient's unconscious expectations of psychotherapy **Competitive**
