## Of Cuts:

**Geometry of Cuts and Metrics** Michel Marie Deza, Monique Laurent, 1997-05-20 Cuts and metrics are well known objects that arise independently but with many deep and fascinating connections in diverse fields in graph theory combinatorial optimization geometry of numbers combinatorial matrix theory statistical physics VLSI design etc This book presents a wealth of results from different mathematical disciplines in a unified comprehensive manner and establishes new and old links which cannot be found elsewhere It provides a unique and invaluable source for researchers and graduate students From the Reviews This book is definitely a milestone in the literature of integer programming and combinatorial optimization It draws from the Interdisciplinarity of these fields With knowledge about the relevant terms one can enjoy special subsections without being entirely familiar with the rest of the chapter This makes it not only an interesting research book but even a dictionary The longer one works with it the more beautiful it becomes Optima 56 1997 **Cake-Cutting**

**Algorithms** Jack Robertson, William Webb, 1998-07-15 The challenge of dividing an asset fairly from cakes to more important properties is of great practical importance in many situations Since the famous Polish school of mathematicians Steinhaus Banach and Knaster introduced and described algorithms for the fair division problem in the 1940s the concept has been widely popularized This book

**Innovations in Applied Artificial Intelligence** Floriana Esposito, 2005-06-28 Intelligent systems are those which produce intelligent outputs AI researchers have been focusing on developing and employing strong methods that are capable of solving complex real life problems The 18th International Conference on Industrial Engineering Applications of Artificial Intelligence Expert Systems IEA AIE 2005 held in Bari Italy presented such work performed by many scientists worldwide The Program Committee selected long papers from contributions presenting more complete work and posters from those reporting ongoing research The Committee enforced the rule that only original and unpublished work could be considered for inclusion in these proceedings The Program Committee selected 116 contributions from the 271 submitted papers which cover the following topics artificial systems search engines intelligent interfaces knowledge discovery knowledge based technologies natural language processing machine learning applications reasoning technologies uncertainty management applied data mining and technologies for knowledge management The contributions oriented to the technological aspects of AI and the quality of the papers are witness to a research activity clearly aimed at consolidating the theoretical results that have already been achieved The conference program also included two invited lectures by Katharina Morik and Roberto Pieraccini Many people contributed in different ways to the success of the conference and to this volume The authors who continue to show their enthusiastic interest in applied intelligence research are a very important part of our success We highly appreciate the contribution of the members of the Program Committee as well as others who reviewed all the submitted papers with efficiency and dedication *Advances in Multimedia Information Processing - PCM 2005* Yo-Sung Ho, Hyoung Joong Kim, 2005-10-31 We are delighted to welcome readers to the proceedings of the 6th Pacific Rim Conference

on Multimedia PCM The first PCM was held in Sydney Australia in 2000 Since then it has been hosted successfully by Beijing China in 2001 Hsinchu Taiwan in 2002 Singapore in 2003 and Tokyo Japan in 2004 and finally Jeju one of the most beautiful and fantastic islands in Korea This year we accepted 181 papers out of 570 submissions including regular and special session papers The acceptance rate of 32% indicates our commitment to ensuring a very high quality conference This would not be possible without the full support of the excellent Technical Committee and anonymous reviewers that provided timely and insightful reviews We would therefore like to thank the Program Committee and all reviewers The program of this year reflects the current interests of the PCM s The accepted papers cover a range of topics including all aspects of multimedia both technical and artistic perspectives and both theoretical and practical issues The PCM 2005 program covers tutorial sessions and plenary lectures as well as regular presentations in three tracks of oral sessions and a poster session in a single track We have tried to expand the scope of PCM to the artistic papers which need not to be strictly technical
