Of Feelings:

Thoughts on the Value of Feelings in Religion Johann Joachim Spalding, 1827 Language of Feelings: How to Help Kids Communicate Emotions with Words Instead of Actions Silas Mary, 2025-01-30 Children often struggle to express their emotions verbally resorting to actions or behaviors that may be confusing or disruptive Language of Feelings helps parents teach their children how to communicate their feelings effectively with words empowering them to express themselves in a healthy and constructive way This book offers practical strategies for identifying and labeling emotions creating open lines of communication and helping children develop emotional intelligence With actionable techniques and exercises this book guides parents in helping their children understand their emotions and express them in ways that encourage empathy problem solving and healthier relationships Language of Feelings shows how you can create an emotionally supportive environment that fosters positive behavior improves communication and helps your child navigate complex emotions with ease By giving children the language to articulate their feelings you re giving them the tools to manage emotions effectively throughout their lives **A Theory of Feelings** Agnes Heller, 2009-02-16 A Theory of Feelings examines the problem of human feelings widely understood from phenomenological analytic and historical perspectives It begins with an analysis of drives and affects and pursues the nature of feeling itself in all of its variability through a close study of the distinctive categories of emotions emotional dispositions orientive feelings and the passions As such the starting point of the anlysis entails an examination of the characteristics of human involvement or our ways of being in the world Building upon this assessment of the conditions of human involvement the philosophical history and emotional economy characteristic of modern relationships is treated and the nature of expression social division suffering and responsibility is evaluated in light of the theory of feeling presented here The book is recommended to anyone interested in philosophy psychology sociology and cognitive science **Feelings and Emotions** Antony S. R. Manstead, Nico Frijda, Agneta Fischer, 2004-04-05 Publisher Description **The Archive of Feelings** Peter Stamm, 2023-12-05 Given a second chance with an old love a coolly detached archivist questions the life he could have had and whether it s not too late to live it A poignant ingeniously constructed new novel from one of Europe s most exciting writers New York Times Book Review Forty years ago almost a lifetime he confessed his love to a classmate and close friend Franziska Now living in his late mother s house with the obsolete archive of the newspaper he once worked for he looks back on days spent poring over files and clippings increasingly withdrawn from the world His occasional relationships never amounted to anything and the memory of Franziska who became pop singer Fabienne continues to haunt him as she appears in the media When the two cross paths again the possibility of a different life feels achingly real But should he risk the comfort of his ordered existence for a romance that might never match what he imagined A subtle mesmerizing portrait of late blooming passion The Archive of Feelings showcases Peter Stamm at his best **Self and Affect** Stefan Lang, Maik Niemeck, 2025-01-11 The self self awareness and emotions are central

subjects within contemporary philosophy of mind but comparatively little attention has been paid to the relationships between them. This volume brings together philosophers from different specialisms to explore these relationships from three different angles. First, whether a theory of self-awareness can contribute to a theory of emotion including how different aspects and kinds of self-awareness are related to different emotions. Second, from the opposite direction, whether research into emotions can help achieve a better understanding of self-consciousness. Finally, the book considers how emotions are involved in the nature and development of selves. *Self and Affect* is essential reading for all scholars and researchers of the philosophy of mind, especially those focussing on emotions and self-awareness.

Pedophilia, Hebephilia and Sexual Offending against Children Klaus M. Beier, 2021-03-08. This book provides extensive information on pedophilia, sexual interest in the prepubescent body age, hebephilia, sexual interest in the early pubescent body age, and sexual offenses against children, i.e. the various forms of child sexual abuse, including the use of child sexual abuse images, along with the current state of knowledge concerning offender groups. The book makes it clear that pedophilia or hebephilia do not inevitably lead to offenses against children; there are those who keep their desires in their fantasies and do not act them out on the behavioral level. The World Health Organization classifies pedophilia as a mental disorder. It can be safely assumed that many pedophile men in a given community live their lives unrecognized and adamant about hiding their sexual drives from society and from themselves, and who are genuinely motivated not to act upon their sexual fantasies. The numbers of exactly this particular group of pedophilically inclined non-offenders can be increased by preventive therapeutic measures. For this purpose, two treatment programs have been developed at the Institute of Sexology and Sexual Medicine at the Charité University Hospital in Berlin: University Clinic since the initiation of the Prevention Project Dunkelfeld in 2005. First, the project involving adult participants, Berlin Dissexuality Therapy (BEDIT), and later another for adolescents (BEDIT-A) who find themselves attracted to children. Both program manuals are completely integrated into this work, which reflects 15 years of assessment and treatment experience.

Researching with Feeling Caroline Clarke, Mike Broussine, Linda Watts, 2014-10-10. Why should researchers be interested in their feelings and emotions as they carry out research? Emotion is what it is to exist to be human and is present in every sphere of our lives. All activities are infused with emotion, even those that are constructed as rational, because rationality and emotionality are interpenetrated and entwined, because all thinking is tinged with feeling and all feeling is tinged with thinking. This book illuminates the emotional processes of doing social and organizational research and the implications of this for the outcomes of research. With contributions from leading academics and research practitioners, it addresses the significant issue of the sometimes intense emotional experiences involved in doing research and the implications it has for the theory and practice of social research. By examining the nature of feelings and emotions, it explores how we might understand researchers' emotions and experiences and considers the often powerful feelings encountered in a variety of research contexts. Topics discussed include power relations, psycho-social explanations of

researcher emotions paradoxical relations with research participants and the sometimes disturbing data that is gained research supervision the politics of research gender publishing undergoing vivas and presenting at conferences This book will therefore be a valuable companion to researchers and research students from the start of their career onwards

Morality and Language of Totalitarianism Andreas Buller, 2023-09-05 The study asks what totalitarian regimes such as Bolshevism National Socialism and Putinism have in common All of these totalitarian systems sought to destroy the universal principles of human morality by replacing them with group class racial or traditional values The direct result of this substitution of values in history has been class terror the Holocaust and brutal violence against both one's own and other peoples The author argues that crimes against humanity are committed on the basis of group rather than universal morality

Laird, 2007-01-11 Feelings argues for the counter intuitive idea that feelings do not cause behavior but rather follow from behavior and are in fact the way that we know about our own bodily states and behaviors This point of view often associated with William James is called self perception theory Self perception theory can be empirically tested by manipulating bodily states and behaviors in order to see if the corresponding feelings are produced In this volume James D Laird presents hundreds of studies all demonstrating that feelings do indeed follow from behavior Behaviors that have been manipulated include facial expressions of emotion autonomic arousal actions gaze and postures The feelings that have been induced include happiness anger fear romantic love liking disliking hunger and feelings of familiarity These feelings do not feel like knowledge because they are knowledge by acquaintance such as the knowledge we have of how an apple tastes rather than verbal knowledge by description such as the knowledge that apples are red round and edible Many professional theories of human behavior as well as common sense explain actions by an appeal to feelings as causes Laird argues to the contrary that if feelings are information about behaviors that are already ongoing feelings cannot be causes and that the whole mechanistic model of human behavior as caused in this sense seems mistaken He proposes an alternative cybernetic model involving hierarchically
