Comfort, 1994-03-17 Tish McWhinny is Miss Marple without the cuteness brought up to date and plunked down in Vermont. She is gutsy and audacious. Margaret Maron. When B. Comfort's *The Cashmere Kid* appeared in 1993, Publishers Weekly wrote Vermont goat herding may not sound like material for a gripping mystery, but in Comfort's hands it achieves that dimension. Now readers who missed the earlier adventures of Tish McWhinny can enjoy the very first, also set in the pristine picture-perfect village of Lofton. The tranquility of this southern Vermont haven is disturbed, however, when Tish's newest neighbor arrives and proves to be an entire cult. Calling itself *The Ring of Right*, its intent and purposes are anything but apparent. Tish first senses that something is odd when a young reporter arrives to write an article on the Ringers and promptly disappears. Then, walking in the woods, Tish tumbles into what, on examination, seems to be an ancient Druid cave. By the time the inevitable murder takes place and Tish herself looks like the suspect, the little town has been transformed into a hotbed of intrigue. **As You Like It** William Shakespeare, 2001-04 Lively, instructive access to Shakespeare's rich and complex works. **Enceladus and the Icy Moons of Saturn** Paul M. Schenk, Roger N. Clark, Carly J. A. Howett, Anne J. Verbiscer, J. Hunter Waite, 2018-11-27 With active geysers coating its surface with dazzlingly bright ice crystals, Saturn's large moon Enceladus is one of the most enigmatic worlds in our solar system. Underlying this activity are numerous further discoveries by the Cassini spacecraft tantalizing us with evidence that Enceladus harbors a subsurface ocean of liquid water. Enceladus is thus newly realized as a forefront candidate among potentially habitable ocean worlds in our own solar system, although it is only one of a family of icy moons orbiting the giant ringed planet, each with its own story. As a new volume in the Space Science Series, *Enceladus and the Icy Moons of Saturn* brings together nearly eighty of the world's top experts writing more than twenty chapters to set the foundation for what we currently understand while building the framework for the highest priority questions to be addressed through ongoing spacecraft exploration. Topics include the physics and processes driving the geologic and geophysical phenomena of icy worlds, including but not limited to ring-moon interactions, interior melting due to tidal heating, ejection and reaccretion of vapor and particulates, ice tectonics, and cryovolcanism. By contextualizing each topic within the profusion of puzzles beckoning from among Saturn's many dozen moons, *Enceladus and the Icy Moons of Saturn* synthesizes planetary processes on a broad scale to inform and propel both seasoned researchers and students toward achieving new advances in the coming decade and beyond. **Hearst Over Hollywood** Louis Pizzitola, 2002 As a feature film producer, Hearst was responsible for some of the most talked-about movies of the 1920s and the 1930s. Behind the scenes in Hollywood, Hearst had few equals; he was a much-feared power broker from the Silent Era to the Blacklisting Era. **Roman House Churches for Today** Reta Halteman Finger, 2007-09-14 Placing the biblical book of Romans in its historical and cultural context, Reta Halteman Finger here creates a simulation of the Roman house churches that first heard Paul's Romans letter and its call for inclusiveness among the people of God.
