Of Reality:

Adorno's Positive Dialectic Yvonne Sherratt, 2002-10-10 This book offers an interpretation of the work of Theodor Adorno. In contrast to the conventional view that Adorno's is in essence a critical philosophy, Yvonne Sherratt traces systematically a utopian thesis that pervades all the major aspects of Adorno's thought. She places Adorno's work in the context of German Idealist and later Marxist and Freudian traditions and then analyses his key works to show how the aesthetic, epistemological, psychological, historical and sociological thought interconnect to form a utopian image. The book will be eagerly sought out by students and specialists in philosophy, social and political theory, intellectual history, literary theory and cultural studies.

An affordable volume available in print or online. **Richard Dawkins' God Delusion** Klaus Nürnberger, 2010-07-12 Part I asks: Is evolving Nature all there is? self-generated, self-sustaining, self-contained. Are human beings as the topmost outgrowth of Nature responsible to none other but themselves? That is the stance of naturalist and atheist Richard Dawkins. Or is evolving reality derived from and dependent on a transcendent Source and Destiny to whom humans are accountable and whose benevolence reaches out to humans as persons because humans are persons? That is the conviction of the Christian faith. Part II shows that Dawkins' interpretation of religion is deficient even in evolutionary terms and lacks the objectivity and impartiality of genuine science.

Spiritual Information Charles L. Harper, 2005-06 *Spiritual Information* is a collection of one hundred essays that explore a portion of the vast interdisciplinary approaches to the study of science and religion. Individually and together the essays show how the study of ourselves, our planet and the universe helps us understand our place as spiritual beings within God's universe. The book is a tribute to Sir John Templeton and his pioneering commitment toward new research that results in one hundredfold more spiritual information than humankind has ever possessed before. It begins with essays that reflect on Sir John's principal domains of interest and expertise: free enterprise, based finance and accelerating spiritual progress. Themes of the sections are: Science, Religion, Dialogue, Cosmology, Physics and Astronomy, Mathematics, Musicology and Speculation, Biological Evolution, the Human Being, Social Evolution, the Human Mind and Heart, Religion and Health, The Nature of the Divine, Theology and Philosophy, Faith, Traditions. Sir John's leadership has enabled us to edge ever closer to the frontier where knowledge meets wisdom at the threshold of ultimate reality, notes the editor in the preface to this volume. As

Spiritual Information presents an overview of how far we have come in the science and religion dialogue it also opens windows to the vast possibilities for additional research and further advances in spiritual information Idealism Tyron Goldschmidt, Kenneth L. Pearce, 2017 Idealism is a family of metaphysical views each of which gives priority to the mental The best known forms of idealism in Western philosophy are Berkeleyan idealism which gives ontological priority to the mental minds and ideas over the physical bodies and Kantian idealism which gives a kind of explanatory priority to the mental the structure of the understanding over the physical the structure of the empirical world Although idealism was once a dominant view in Western philosophy it has suffered almost total neglect over the last several decades This book rectifies this situation by bringing together seventeen essays by leading philosophers on the topic of metaphysical idealism The various essays explain attack or defend a variety of idealistic theories including not only Berkeleyan and Kantian idealisms but also those developed in traditions less familiar to analytic philosophers including Buddhism and Hassidic Judaism Although a number of the articles draw on historical sources all will be of interest to philosophers working in contemporary metaphysics This volume aims to spark a revival of serious philosophical interest in metaphysical idealism Fiction and the Ways of Knowing Avrom Fleishman, 2014-07-03 In this highly individual study Avrom Fleishman explores a wide range of literary references to human culture the culture of ideas facts and images Each critical essay in Fiction and the Ways of Knowing takes up for sustained analysis a major British novel of the nineteenth or the twentieth century The novels are analyzed in the light of social historical philosophical and other perspectives that can be grouped under the human sciences The diversity of critical contexts in these thirteen essays is organized by Avrom Fleishman s governing belief in the interrelations of literature and other ways of interpreting the world The underlying assumptions of this approach as explained in his introductory essay are that fiction is capable of encompassing even the most recondite facts and recalcitrant ideas that fiction though never a mirror of reality is linked to realities and takes part in the real and that a critical reading may be informed by scientific knowledge without reducing the literary work to a schematic formula Fleishman investigates the matters of fact and belief that make up the designated meanings the intellectual contexts and the speculative parallels in three types of novel Some of the novels discussed make it clear that their authors are informed on matters beyond the nonspecialist s range these essays help bridge this information gap Other fictional works are only to be grasped in an awareness of the cultural lore tacitly distributed in their own time a modern reader must make the effort to fathom their anachronisms And other novels can be found to open passageways that their authors can only have glimpsed intuitively these must be pursued with great caution but equal diligence The novels discussed include Little Dorrit The Way We Live Now Daniel Deronda he Return of the Native and The Magus Also examined are Wuthering Heights Vanity Fair Northanger Abbey To the Lighthouse Under Western Eyes Ulysses and A Passage to India *Self, Reason, and Freedom* Andrea Christofidou, 2013-01-03 Freedom and its internal relation to reason is fundamental to Descartes philosophy in general and to

his Meditations on First Philosophy in particular Without freedom his entire enquiry would not get off the ground and without understanding the role of freedom in his work we could not understand what motivates key parts of his metaphysics Yet not only is freedom a relatively overlooked element but its internal relation to reason has gone unnoticed by most studies of his philosophy Self Reason and Freedom A New Light on Descartes Metaphysics by defending freedom's internal relation to reason sheds new light on Descartes metaphysics and restores the often dismissed Fourth Meditation to the core of his metaphysics as he conceived it Implicit in that relation is a rejection of any authority external to reason Andrea Christofidou shows how this lends strength and explanatory force to Descartes enquiry and reveals his conception of the unity of the self and of its place in the world Self Reason and Freedom A New Light on Descartes Metaphysics is essential reading for students and scholars of Descartes and anyone studying seventeenth century philosophy

The Philosophy of Change Chung-ying Cheng, 2023-08-01 In The Philosophy of Change the distinguished scholar of Chinese philosophy Chung ying Cheng advances our understanding of the Yijing by analyzing its philosophy in comparison to Western philosophical traditions Cheng focuses on critically comparing philosophies of science religion and metaphysics in Leibniz Whitehead Neville and Cobb alongside classical Chinese views on reality divinity knowledge and morality The book begins and ends with questions related to the character of Chinese metaphysical traditions which contrast with the mainline metaphysical traditions found in Western Europe and North America Cheng argues throughout the book that the philosophical underpinnings of basic concepts in Chinese culture are ultimately rooted in key claims found within the Yijing and one of its standard commentaries the Yizhuan The book serves as a complementary volume to the author's previous book The Primary Way Philosophy of the Yijing which lays out a comprehensive and systematic philosophy based on the symbolism and text of the classical document and its traditional commentaries

A Conceptual-analytic Study of Classical Indian Philosophy of Morals Rajendra Prasad, 2008 Using reconstructive ideas available in classical Indian original works this book makes a departure in the style of modern writings on Indian moral philosophy It presents Indian ethics in an objective secular and wherever necessary critical manner as a systematic down to earth philosophical account of moral values virtues rights and obligations It thereby refutes the claim that Indian philosophy has no ethics as well as the counter claim that it transcends ethics It demonstrates that moral living proves that the individual his society and the world are really real and not only taken to be real for behavioral purposes as the Advaitins hold the self is amoral being a non agent moksha is not a moral value and the Karmic theory because of involving belief in rebirth does not guarantee that the doer of an action is also the experiencer of its results contrary to what is commonly held and Indian ethics can sustain itself even if such notions are dropped Rajendra Prasad calls Indian ethics organismic because along with ethical concerns it also covers issues related to professions politics administration sex environment etc Therefore in one format it is theoretical and applied normative and metaethical humanistic and non humanistic etc of course within the limits of the then cognitive enquiry
