Queer in the Tropics Pedro Paulo Gomes Pereira, 2019-04-11 This book aims to reflect on how to translate queer in the context of Latin America Queer theory is becoming consolidated on an international scale as an effort to understand dissident bodies and their inventions But how can we utilize such a rich body of literature and proposals without merely applying in the Global South what has been formulated in the Global North Through meetings between dissident bodies in the Global South the book suggests that the theoretical poetic inventions formulated in this part of the world cannot be forgotten and proposes a discussion on how to approach queer theory from a decolonial point of view There is still only a scant body of literature that systematizes and approaches these questions from a Latin American point of view or to use the term that gives this book its name the tropics The book points out the necessity of staying aware of the connections between western modernity and

colonial practices The book therefore invites us to pass through borders to question limits and to allow ourselves to be affected by Others a fundamental exercise in the context of social inequality as drastic as that in which the majority of the population live in Latin America and in the Global South in general Theories like bodies travel in being translated they transform themselves The movements and the bending of bodies and theories are disturbing and subversive Queer in the Tropics arises from these translations from this bending and from these subversions *Shakespeare and Renaissance Literary Theories* Michele Marrapodi, 2016-04-01 Throwing fresh light on a much discussed but still controversial field this collection of essays places the presence of Italian literary theories against and alongside the background of English dramatic traditions to assess this influence in the emergence of Elizabethan theatrical convention and the innovative dramatic practices under the early Stuarts Contributors respond anew to the process of cultural exchange cultural transaction and generic intertextuality involved in the debate on dramatic theory and literary kinds in the Renaissance exploring with special emphasis on Shakespeare's works the level of cultural appropriation contamination revision and subversion characterizing early modern English drama Shakespeare and Renaissance Literary Theories offers a wide range of approaches and critical viewpoints of leading international scholars concerning questions which are still open to debate and which may pave the way to further groundbreaking analyses on Shakespeare's art of dramatic construction and that of his contemporaries

Discovery and Explanation in Biology and Medicine Kenneth F. Schaffner, 1993 Kenneth F. Schaffner compares the practice of biological and medical research and shows how traditional topics in philosophy of science, such as the nature of theories and of explanation, can illuminate the life sciences. While Schaffner pays some attention to the conceptual questions of evolutionary biology, his chief focus is on the examples that immunology, human genetics, neuroscience, and internal medicine provide for examinations of the way scientists develop, examine, test, and apply theories. Although traditional philosophy of science has regarded scientific discovery, the questions of creativity in science as a subject for psychological rather than philosophical study, Schaffner argues that recent work in cognitive science and artificial intelligence enables researchers to rationally analyze the nature of discovery. As a philosopher of science who holds an M.D., he has examined biomedical work from the inside and uses detailed examples from the entire range of the life sciences to support the semantic approach to scientific theories, addressing whether there are laws in the life sciences as there are in the physical sciences. Schaffner's novel use of philosophical tools to deal with scientific research in all of its complexity provides a distinctive angle on basic questions of scientific evaluation and explanation.
