

- 89 percent of college students use search engines to begin an information search (while only 2 per cent start from a library web site)
- 93 per cent are satisfied or very satisfied with their overall experience of using a search engine (compared with 84 per cent for a librarian-assisted search)
- Search engines fit college students' life styles better than physical or online libraries and that fit is 'almost perfect'
- College students still use the library, but they are using it less (and reading less) since they first began using Internet research tools
