The approach to treatment utilizes the integrative capacity of the brain to create a self-foster insight and produce change. Treatment strategies are based on cutting-edge understanding of neurobiology, the development of the brain, and the storage and retrieval of traumatic memory. Case vignettes illustrate specific examples of the reactions of children, families, and teens to acute and repeated exposure to traumatic events. Also presented is the most recent knowledge of the role of the right hemisphere (RH) in development and therapy. Right-brain communication and how to recognize the non-verbal, symbolic, and unconscious affective processes will be explained along with examples of how the therapist can utilize art-making, media tools, and self to engage in a two-person biology.

The Intersection of Trauma and Disaster Behavioral Health Katie E. Cherry, Allison Gibson, 2020-11-19. This contributed volume examines the intersection of trauma and disaster behavioral health from a lifespan perspective, filling a critical gap in the literature on disaster mental health research. In the chapters, the contributors evaluate behavioral data of adults exposed to various environmental events in both the United States (i.e., the 2017 Hurricanes Irma in Florida and Harvey in Houston) and abroad (i.e., missile fire in the 2014 Israel-Gaza conflict). Contributors also suggest future directions, practices, and policies for trauma and disaster response. The three parts of the book provide an overview of disaster behavioral health across the lifespan, propose practical applications of research theories to psychosocial problems resulting from disasters and trauma, and evaluate disaster and trauma interventions from a macro-level perspective. Topics explored among the chapters include Integrating Trauma-Informed Principles into Disaster Behavioral Health, Targeting Older Adults, Cultural Competence and Disaster Mental Health When Disasters Strike, Navigating the Challenges of Sudden Science Frameworks of Recovery, Health Caught at the Intersection of Housing, Education, and Employment Opportunities After Hurricane Katrina, Substance Use Issues and Behavioral Health After a Disaster, Psychosocial Recovery After Natural Disaster, International Advocacy Policy and Recommendations. *The Intersection of Trauma and Disaster Behavioral Health* is a vital resource for researchers whose expertise covers the domains of trauma, health, and wellness, and natural and technological disasters.
