Underwood,2024-05-01 Originally published in 1986 Slow Grows the Child came out of a symposium held in Washington D C in 1984 which brought together researchers and practitioners in the field producing recommendations for future research It was the beginning of an informal network among researchers In the 1970s and 1980s the odds that a short statured person would be socially and emotionally fulfilled were judged by some to be not very good There was a pervasive belief that equated tallness with strength and shortness with weakness and a lack of social desirability The recognition that delays in growth could be modified by medical therapies had led to increased awareness of psychological and social effects on short stature children There had been little consensus about how best to measure the psychological and social adjustment of short individuals It was hoped this title would advance understanding of the social and psychological experience of growth delay and increase the odds that medical and psychological intervention would produce the most desirable outcome Health Promotion of the Child with Long-term Illness Shirley Steele,1983 Social Work Live Carol Dorr,2014 Social Work Live accesses multiple approaches to student learning experiential visual and auditory Carol Dorr emphasizes the important role of self reflection and critical thinking in social work practice by paying special attention to process recordings and observing how the social worker reflects on her own reactions in the moment with the client Students also can appreciate the important role of reflecting on their own interventions with clients after their sessions acknowledging what went well and what could have been done better Social Work Live encourages a constructivist perspective to practice that calls attention to the many possible interpretations and approaches to working with clients The classroom provides an ideal opportunity for students to explore with each other different ways of making meaning out of clients stories and intervening with them The American Journal of Occupational Therapy ,1976 Official publication of the American Occupational Therapy Association **Your Child** Fitzhugh Dodson,Ann Alexander,1986 General Clinical Research Centers Research Resources Information Center,1978 Descriptions of facilities and investigations in 80 general clinical research centers funded by the Division of Research Resources in the United States Intended for researchers interested in clinical studies of human disorders Geographical arrangement by states Each entry

Christ,Kalman Flomenhaft,2012-12-06 The past decade has brought extraordinary gains in the outlook for children stricken with cancer Though cancer remains a leading cause of death for children and young adults more victims of child hood cancer today will survive than will die The therapeutic advances and the optimism they instill have prompted researchers and clinicians to analyze the impact of cancer upon young patients and their famil ies and to devise more effective intervention strategies Hope and survival juxtaposed with the continuing high mortality associated with certain forms of the illness add new challenges to management of the psychosocial aspects of cancer To respond to these challenges we need research as rigorous as that which continues to make inroads in treating the physical illness This specific concern for the needs of children suffering from cancer and their families has paralleled an increasing sensitivity on the part of the medical community and the public at large to the limitations of specialized high technology health care practices
