Coping With Burglary Research Perspectives On Policy:

Coping with Burglary R.V.G. Clarke,T. Hope,2012-12-06 This book contains the papers given at a workshop organised by the Home Office England and Wales on the subject of residential burglary This is a topic of much public concern and I welcome the Home Office initiative in mounting the workshop The contributors were all researchers and criminologists who have made a special study of burglary and their brief was to consider the implications of their work for policy As a policeman I find their work of particular interest and relevance at this time when police performance as traditionally measured by the clear up rate is not keeping pace with the increase in the numbers of burglaries coming to police attention The finding that increases in burglary are more reflective of the public's reporting habits than of any significant rise in the actual level of burglary helps with perspective but offers little comfort to policemen The 600 0 increase in the official statistics since 1970 is accompanied by a proportionate increase in police work in visiting victims searching scenes of crime writing crime reports and completing other documentation In some forces the point has been reached where available detective time is so taken up by the volume of visits and reports that there is little remaining for actual investigation But because of the random and opportunist nature of burglary it cannot be said with any confidence that increasing investigative capacity would make a significant and lasting impact on the overall burglary figures Handbook of Crime Prevention and Community Safety Nick

Tilley,Aiden Sidebottom,2017-03-27 This second edition of the Handbook of Crime Prevention and Community Safety provides a completely revised and updated collection of essays focusing on the theory and practice of crime prevention and the creation of safer communities This book is divided into five comprehensive parts Part I brand new to this edition is concerned with theoretical perspectives on crime prevention and community safety Part II considers general approaches to preventing crime including a new chapter on the theory and practice of deterrence Part III focuses on specific crime prevention strategies including a new chapter on regulation for crime prevention Part IV focuses on the prevention of specific categories of crime and the fear they generate including new chapters on organised crime and cybercrime Part V considers the preventative process the methods through which presenting problems can be analysed responses formulated and implemented and their effectiveness evaluated Bringing together leading academics and practitioners from the UK US Australia and the Netherlands this volume will be an invaluable reference for researchers and practitioners whose work relates to crime prevention and community safety as well as for undergraduate and postgraduate courses in crime prevention

Routledge Library Editions: Social & Cultural Geography Various Authors,2022-07-30 Re issuing books originally published between 1969 and 1990 this set of 15 volumes gives a 20 year perspective on the development of the discipline of social geography The books emphasize the increasingly important contribution of geographical theory to the understanding of social change values economic and political organization and ethical imperatives The volumes are authored by well known international geographers and discuss the philosophy and sociology of geography as well as key themes such as the

geography of health crime space They also examine the cross over of geography with other disciplines such as literature and history

Reducing Burglary Andromachi Tseloni, Rebecca Thompson, Nick Tilley, 2018-12-11 Domestic burglary has fallen significantly over the past 20 years in many countries but still remains a high volume crime On top of substantial financial loss and property damage burglary also leads to high levels of anxiety and fear of crime The research presented in this book represents the first systematic study of what actually works in security interventions against burglary with cross sectional data on different regions and socio economic population groups This work provides an overview of the scope of the problem and what can be done about it drawing on extensive research evidence from projects funded by the Economic and Social Research Council ESRC Secondary Data Analysis Initiative SDAI and other sources It reports detailed findings about which interventions are most effective for different population groups and how these measures can be implemented It includes burglary prevention advice for homeowners law enforcement and other public agencies and makes recommendations for future research In addition to being relevant to concerned citizens police policy makers and crime prevention practitioners this book will also be of interest to researchers in criminology and criminal justice particularly those working on security and crime prevention as well as urban planning and public policy

Teaching the American Civil Rights Movement Julie Buckner Armstrong, Susan Hult Edwards, Houston Bryan Roberson, Rhonda Y. Williams, 2012-11-12 The past fifteen years have seen renewed interest in the civil rights movement Television documentaries films and books have brought the struggles into our homes and classrooms once again New evidence in older criminal cases demands that the judicial system reconsider the accuracy of investigations and legal decisions Racial profiling affirmative action voting districting and school voucher programs keep civil rights on the front burner in the political arena In light of this there are very few resources for teaching the civil rights at the university level This timely and invaluable book fills this gap This book offers perspectives on presenting the movement in different classroom contexts strategies to make the movement come alive for students and issues highlighting topics that students will find appealing Including sample syllabi and detailed descriptions from courses that prove effective this work will be useful for all instructors both college and upper level high school for courses in history education race sociology literature and political science

Crime Prevention Steven P. Lab, 2023-02-28 Crime Prevention Approaches Practices and Evaluations Eleventh Edition meets the needs of students and instructors for engaging evidence based impartial coverage of interventions that can reduce or prevent deviance This edition examines the entire gamut of prevention from physical design to developmental prevention to identifying high risk individuals to situational initiatives to partnerships and beyond Strategies include primary prevention measures designed to prevent conditions that foster deviance secondary prevention measures directed toward persons or conditions with a high potential for deviance and tertiary prevention measures to deal with persons who have already committed crimes In this book Lab offers a thorough and well rounded discussion of the many

sides of the crime prevention debate in clear and accessible language including the latest research concerning space syntax physical environment and crime neighborhood crime prevention programs community policing crime in schools and electronic monitoring and home confinement This book is essential for undergraduates studying criminal justice criminology and sociology in the U S and globally Online resources include an instructor s manual test bank and lecture slides for faculty and a wide array of resources for students

Classics in Environmental Criminology Martin A. Andresen, Paul J. Brantingham, J. Bryan Kinney, 2010-05-25 A careful analysis of environmental factors is key to understanding the causes of crime to solving crimes and eventually helping to predict and prevent them *Classics in Environmental Criminology* is a comprehensive collection of seminal pieces from legendary contributors who focus on the role that the immediate environment plays in the occurrence of a crime Defines the field Divided into three parts the book begins by highlighting the development of environmental criminology as a discipline through its origins in spatial criminology It examines social disorganization theory which explains criminal activity with reference to the characteristics of the community that delinquents live in It then discusses the ecology of crime with reference to macroenvironments and microenvironments The next section introduces concepts such as routine activity theory the geometric theory of crime the rational choice theory of offending and crime pattern theory Offers perspectives on prevention The last part focuses on the concept of crime prevention examines the idea of altering the environment in order to prevent crime and discusses situational crime factors and efforts to reduce the opportunities for crimes to be committed It considers the impact of routine activities on crime prevention initiatives and advocates a flexible approach to crime prevention based on the dynamic nature of our environment The book concludes with a chapter outlining how environmental criminology has evolved in recent years and provides a future outlook on where it may be headed Invaluable as a textbook and as a professional reference this volume is a comprehensive survey of a critical field in contemporary criminological theory Offering insight assembled by top academic figures within the criminology community this work is destined to provoke further inquiry and research

Putting Crime in its Place David Weisburd, Wim Bernasco, Gerben Bruinsma, 2008-10-20 Putting Crime in its Place Units of Analysis in Geographic Criminology focuses on the units of analysis used in geographic criminology While crime and place studies have been a part of criminology from the early 19th century growing interest in crime places over the last two decades demands critical reflection on the units of analysis that should form the focus of geographic analysis of crime Should the focus be on very small units such as street addresses or street segments or on larger aggregates such as census tracts or communities Academic researchers as well as practical crime analysts are confronted routinely with the dilemma of deciding what the unit of analysis should be when reporting on trends in crime when identifying crime hot spots or when mapping crime in cities In place based crime prevention the choice of the level of aggregation plays a particularly critical role This peer reviewed collection of essays aims to contribute to crime and place studies by making explicit the problems involved in choosing units

of analysis in geographic criminology Written by renowned experts in the field the chapters in this book address basic academic questions and also provide real life examples and applications of how they are resolved in cutting edge research Crime analysts in police and law enforcement agencies as well as academic researchers studying the spatial distributions of crime and victimization will learn from the discussions and tools presented *Design Against Crime* Caroline L. Davey, Andrew B. Wootton, 2017-02-17 *Design Against Crime* will aid the design profession to meet the challenges presented by the competing needs and complex systems around crime and security It proposes that designers should use their creative talents to develop innovative solutions to security problems that contribute to the ongoing fight against crime The authors first explain the design against crime approach to security and security They go on to provide practical advice on addressing crime and insecurity within the design process and offer practical examples of design being applied to security and safety They also examine crime victimisation from a global perspective highlighting the benefits worldwide of reducing opportunities for crime including issues of national security such as terrorism and natural disasters A design led human centred approach provides a way forward that is both aspirational and practical The book is aimed primarily at design professionals educators and students interested in safety and security from all design disciplines including product design architecture service design and communication design The book should also be read by crime prevention experts planners local authorities managers of urban environments and policymakers *Crime, Violence, Justice and Social Order* Paul Ponsaers, Adam Crawford, Jacques de Maillard, Joanna Shapland, Antoinette Verhage, 2013 This book contains a selection of papers which were presented and discussed at the first GERN Summer School for PhD students held in September 2012 at Ghent University Belgium Backcover *The Reasoning Criminal* Derek B. Cornish, Ronald V. Clarke, 2014-02-10 The assumption that rewards and punishments influence our choices between different courses of action underlies economic sociological psychological and legal thinking about human action Hence the notion of a reasoning criminal one who employs the same sorts of cognitive strategies when contemplating offending as they and the rest of us use when making other decisions might seem a small contribution to crime control This conclusion would be mistaken This volume develops an alternative approach termed the rational choice perspective to explain criminal behavior Instead of emphasizing the differences between criminals and non criminals it stresses some of the similarities In particular while the contributors do not deny the existence of irrational and pathological components in crimes they suggest that the rational aspects of offending should be explored An international group of researchers in criminology psychology and economics provide a comprehensive review of original research on the criminal offender as a reasoning decision maker While recognizing the crucial influence of situational factors the rational choice perspective provides a framework within which to incorporate and locate existing theories about crime In doing so it also provides both a new agenda for research and sheds a fresh light on deterrent and prevention policies *Crime, Risk and Insecurity* Tim Hope, Richard Sparks, 2012-11-12 This book presents new empirical

and conceptual work on the questions of fear anxiety risk and trust both as problems of everyday living and as key themes in the culture and politics of contemporary Western societies The volume includes contributions from distinguished social researchers from Britain the United States Germany and Italy and will be of interest to academics and students in the areas of criminology and sociology

Coming to Terms with Policing Rod Morgan, David J. Smith, 2023-03-31 In the late 1980s the role of the police and their accountability to the community had been at the centre of much debate Originally published in 1989 this important collection of original essays from the leading independent academic researchers on the police in Britain addresses the major issues in this debate How far police behaviour is shaped by law what the public expect of the police how the police handle race relations and how the police effectiveness can best be measured are discussed in the light of the latest research The central focus of the volume is the notion of policing by consent and the way this is interpreted in practice The essays range from basic analyses of what the police do to major evaluations of recent policy initiatives such as neighbourhood watch The contributors discuss a range of issues from new programmes for police training to the role of chief constables Written in a form accessible to students of policing and police officers *Coming to Terms with Policing* sheds light on trends at the time and suggests new directions for policing policy

Routine Activity and Rational Choice Ronald V. Clarke, Marcus Felson, 2017-10-23 Two new criminological approaches are defined and applied to categories of crime in *Routine Activity and Rational Choice* now available in paperback *Routine activity* analyzes the criminal event and avoids motivations and psychology as topics for discussion whereas *rational choice* approaches crime as purposive behavior designed to meet the offender's commonplace needs such as money status sex and excitement These conceptual models are both employed to analyze such crimes as drunk driving gun use kidnapping and political violence This volume discusses the relationship of these theories to more traditional approaches to crime studies The *Advances in Criminological Theory* series encourages theory construction and validation in the articles and themes selected for publication It also furthers the free exchange of ideas propositions and postulates Following publication of the first volume Michael J Lynch of Florida State University asserted that *Advances in Criminological Theory* is to be applauded as an attempt to revive criminological theory by providing an accessible outlet Contributions to this volume include Pierre Tremblay *Searching for Suitable Co-offenders* Raymond Paternoster and Sally Simpson *A Rational Choice Theory of Corporate Crime* Richard B Felson *Predatory and Dispute related Violence* Gordon Trasler *Conscience Opportunity Rational Choice and Crime* Ezzat A Fattah *The Rational Choice Opportunity Perspectives as a Vehicle for Integrating Criminological and Victimological Theories* Patricia L Brantingham and Paul J Brantingham *Environment Routine and Situation* Maurice Cusson *A Strategic Analysis of Crime* Richard W Harding *Gun Use in Crime Rational Choice and Social Learning Theory*

Taking Care Neil D. Weinstein, 1987-08-13 The reasons why people take precautions and why they don't are examined by experts from a wide range of fields who explore the theoretical and practical issues involved in understanding self-protective behavior Crime,

Disorder and Community Safety Roger Matthews, John Pitts, 2001 These essays explore the theory politics and practice associated with the changing nature of crime prevention disorder and community safety and assess their significance in relation to a number of specific groups such as women

Innovations in Policing Mollie Weatheritt, 2023-03-31 Modern police forces are large and complex organisations expected to perform a diversity of tasks and are under pressure to account for their activities in ways which satisfy a variety of constituencies Originally published in 1986 this book documents some of the changing demands and pressures on the police at the time It shows how the police were responding and assesses the extent to which they were open minded and receptive to change The book brings together in one place and critically reviews information on a considerable number of police operational and management initiatives It describes and assesses recent innovations and experiments in two main areas patrol and crime prevention It describes attempts to make the police more efficient and effective and to measure the results of what they do It documents the interest of central government in what the police do and shows how this can affect police operational priorities Throughout this book is concerned to analyse police practice and attitudes and to set them against a wider background of pressures to improve police effectiveness

Environmental Crime and Criminality Sally M. Edwards, Terry D. Edwards, Charles B. Fields, 2013-08-01 First published in 1996 One of the primary goals of this series has been to explore new areas of criminology and criminal justice topics that constitute the frontiers of the field This work edited by Sally Edwards Terry Edwards and Charles Fields exemplifies that purpose in its coverage of environmental crime While corporate and political crime developed slowly into mainstream criminology over the last half century environmental crime as an area of emphasis is still in its infancy It is unusual to have many varied and informative perspectives early in a subject s development This volume however demonstrates that many people are already examining environmental crime perhaps as an extension of both the greater environmental movement and the broadening of the popular parameters of crime

What is Criminology? Mary Bosworth, Carolyn Hoyle, 2012-05-31 Criminology is a booming discipline yet one which can appear divided and fractious In this rich and diverse collection of 34 essays some of the worlds leading criminologists respond to a series of questions designed to investigate the state impact and future challenges of the discipline What is criminology for What is the impact of criminology How should criminology be done What are the key issues and debates in criminology today What challenges does the discipline of criminology face How has criminology as a discipline changed over the last few decades The resulting essays identify a series of intellectual methodological and ideological borders Borders in criminology as elsewhere are policed yet they are also frequently transgressed criminologists can and do move across them to plunder admire or learn from other regions While some boundaries may be more difficult or dangerous to cross than others it is rare to find an entirely secluded locale or community In traversing ideological political geographical and disciplinary borders criminologists bring training tools and concepts as well as key texts to share with foreigners From such exchanges over time borders may break down

shift or spring up enriching those who take the journey and those who are visited It is in other words in criminologys capacity for and commitment to reflexivity on which the strength of the field depends
