Coping With Infant Or Fetal Loss:

Coping with Infant Or Fetal Loss Kathleen R. Gilbert, Laura S. Smart, 1992 **Midwives Coping with Loss and Grief** Doreen Kenworthy, Mavis Kirkham, 2011 The experience of stillbirth and other losses in pregnancy at what is usually a time of great joy is tragic for everyone involved including midwifery professionals Although research increasingly shows how profound the effects of loss can be few studies have explored the effects of pregnancy loss which often leads to other personal and professional traumas such as loss of autonomy or a workplace on midwives This in depth investigation uses a phenomenological approach to capture midwives experiences of loss and grief in their own words and encompasses both pregnancy loss and wider professional and personal issues It then makes recommendations to enhance midwives resilience and ability to cope appropriately whilst giving maximum support to their clients Reflections on the emerging implications for midwifery education and practice further broaden the scope of the analysis The insights in this book will be of great use to midwifery managers and supervisors They will also help midwives to nurture themselves their colleagues and their clients at a time when pressures on the service can leave support lacking The devastating experience of losing a baby for women and their families is something that as midwives we strive to understand in order to provide appropriate practical and emotional support Doreen and Mavis encourage us to consider how we are affected by the grief of others at a deeply personal level Ultimately the message in this book is one of hope through reflection and the sharing of experiences midwives who have been with women whose babies have died can regain their personal strength and learn to re shape memories in ways that contribute to personal growth and understanding A From the Foreword by Nicky Leap *Home Care for the High-risk Infant* Elizabeth Ahmann, 1996 This revised expanded edition addresses the increased interest in and demand for information about the nursing care of premature technology dependent infants once they are at home Clinical practice and research updates care plans assessment forms sample care maps and other hands on materials presented in an 8 1 2 x 11 format make this a practical tool as well as a textbook **Palliative Care for Infants, Children, and Adolescents** Brian S. Carter, Marcia Levetown, Sarah E. Rosenblatt, 2016-02-04 Explores what couple and individual stories say and do not say about the child s dying and death and about parent grief The author uses narratives as his tool for the introduction and exploration of the many facets of parental grief *Death And Trauma* Charles R. Figley, Brian E. Bride, Nicholas Mazza, 2022-09-16 First published in 1997 Although the fields of thanatology and traumatology have received robust attention during their parallel development little effort has been made to address their overlapping territory This volume is the first attempt to do so Specifically the purpose of this book is fourfold First is to provide a theoretical bridge between the two fields by providing conceptual terminology such as

defining normal versus dysfunctional bereavement and the meaning and range of death related PTSD The second confirms and illustrates the identical patterns of reactions between those who survive the death of a loved one and those who survive other traumatic events Next the book applies the most useful theoretical models to the bereavement experience and in turn acknowledges the utility of generalizing bereavement models to other traumatic experiences in doing so the two fields can enrich each other Similarly the volume s final purpose is to identify and apply the most useful and effective approaches in traumatology literature to the study diagnosis and treatment of traumatic stressors other than death
