Verified Software: Theories, Tools, Experiments Bertrand Meyer, Jim Woodcock, 2008-06-29 A Step Towards Verified Software Worries about the reliability of software are as old as software itself techniques for allaying these worries predate even James King's 1969 thesis on A program verifier What gives the whole topic a new urgency is the conjunction of three phenomena the blitz like spread of software rich systems to control ever more facets of our world and our lives our growing impatience with deficiencies and the development proceeding more slowly alas than the other two trends of techniques to ensure and verify software quality In 2002 Tony Hoare one of the most distinguished contributors to these advances over the past four decades came to the conclusion that piecemeal efforts are no longer sufficient and proposed a Grand Challenge intended to achieve over 15 years the production of a verifying compiler a tool that while processing programs would also guarantee their adherence to specified properties of correctness robustness safety security and other desirable properties As Hoare sees it this endeavor is not a mere research project as might normally be carried out by one team or a small consortium of teams but a momentous endeavor comparable in its scope to the successful mission to send a man to the moon or to the sequencing of the human genome

Software Engineering and Middleware Alberto Coen-Porisini, André van der Hoeck, 2007-07-12 The 3rd International Workshop on Software Engineering and Middleware SEM 2002 was held May 20-21 2002 in Orlando Florida as a co located event of the 2002 International Conference on Software Engineering The workshop attracted 30 participants from academic and industrial institutions in many countries Twenty seven papers were submitted of which 15 were accepted to create a broad program covering the topics of architectures specification components and adaptations technologies and services The focus of the workshop was on short presentations with substantial discussions afterwards Thus we decided to include in this proceedings also a short summary of every technical session which was written by some of the participants at

the workshop The workshop invited one keynote speaker Bobby Jadhav of CalKey who presented a talk on the design and use of model driven architecture and middle ware in industry We would like to thank all the people who helped organize and run the workshop In particular we would like to thank the program committee for their careful reviews of the submitted papers Wolfgang Emmerich for being an excellent General Chair and the participants for a lively and interesting workshop

Embedded Systems Design Bruno Bouyssounouse, Joseph Sifakis, 2005-02-07 Embedded systems now include a very large proportion of the advanced products designed in the world spanning transport avionics space automotive trains electrical and electronic appliances cameras toys televisions home appliances audio systems and cellular phones process control energy production and distribution factory automation and optimization telecommunications satellites mobile phones and telecom networks and security e commerce smart cards etc The extensive and increasing use of embedded systems and their integration in everyday products marks a significant evolution in information science and technology We expect that within a short timeframe embedded systems will be a part of nearly all equipment designed or manufactured in Europe the USA and Asia There is now a strategic shift in emphasis for embedded systems designers from simply achieving feasibility to achieving optimality Optimal design of embedded systems means targeting a given market segment at the lowest cost and delivery time possible Optimality implies seamless integration with the physical and electronic environment while respecting real world constraints such as hard deadlines reliability availability robustness power consumption and cost In our view optimality can only be achieved through the emergence of embedded systems as a discipline in its own right
