The Core Model Ibis Sanchez Serrano, 2019-06-05 The Core Model A Collaborative Paradigm for the Pharmaceutical Industry and Global Health Care develops the innovative core model an organizational research and design paradigm and economic theory that proposes a collaborative approach to resolving global health issues and improving the productivity of drug development The model proposes that scientific collaboration does not occur in an unstructured manner but actually takes place within a highly structured order where knowledge is transferred integrated and finally translated into commercial products An understanding of this model will help solve the global pharmaceutical industry's productivity problems and address important global health care and economic issues This book is useful to researchers advanced students regulators and management in pharmaceutical industries as well as healthcare professionals those working in health economics and those interested in scientific innovation processes *The Core Model A*. Dodd, 1982-03-04 This book aims to introduce the core model to those with a basic knowledge of axiomatic set theory The covering lemma for K is the main technical result but other applications are also considered **The Core Model Iterability Problem** John R. Steel, 2017-03-02 Suitable for graduate students and researchers in set theory this volume develops a method for constructing core models that have Woodin cardinals **Entity Framework Core in Action, Second Edition** Jon P. Smith, 2021-06-08 Entity Framework Core in Action Second Edition teaches you to write flawless database interactions for .NET applications Following relevant examples from author Jon Smith's extensive experience you'll progress quickly from EF basics to advanced techniques In addition to the latest EF features this book addresses performance security refactoring and unit testing This updated edition also contains new material on NoSQL databases Early Learning and Development Marilyn Flier, 2010-03-22 Early Learning and Development offers new models of conceptual play practice and theory *Acid Deposition Control Act of 1986* United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Health and the Environment, 1986 **Implementation and Integration of Information Systems in the Service Sector** Wang, John, 2012-12-31 With the continuous growth of the service sector the ability to develop and implement information systems is important in order to measure progress Implementation and Integration of Information Systems in the Service Sector is a collection of research which discusses the application of information systems as well as the established ideas and advancements in the service sector This book aims to utilize new theories technologies models and methods in order to discover effective functions in this area **Biosimulation in Drug Development** Martin Bertau, Erik Mosekilde, Hans V. Westerhoff, 2007-11-28 This first comprehensive survey to cover all pharmaceutically relevant topics provides a comprehensive introduction to this novel and revolutionary tool presenting both concepts and application examples of biosimulated cells organs and organisms Following an introduction to the role of biosimulation in drug development the authors go on to discuss the simulation of cells and tissues as well as simulating drug action and effect A further section is

devoted to simulating networks and populations and the whole is rounded off by a look at the potential for biosimulation in industrial drug development and for regulatory decisions Part of the authors are members of the BioSim Network of Excellence that encompasses more than 40 academic institutions pharmaceutical companies and regulatory authorities dealing with drug development other contributors come from industry resulting in a cross disciplinary expert reference

Formal Methods and Software Engineering Michael Butler,Sylvain Conchon,Fatiha Zaïdi,2015-11-30 This book constitutes the refereed proceedings of the 17th International Conference on Formal Engineering Methods ICFEM 2015 held in Paris France in November 2015 The 27 revised full papers presented were carefully reviewed and selected from 82 submissions The papers cover a wide range of topics in the area of formal methods and software engineering and are devoted to advancing the state of the art of applying formal methods in practice They focus in particular on combinations of conceptual and methodological aspects with their formal foundation and tool support Surveys in Combinatorics 2024

Felix Fischer,Robert Johnson,2024-06-13 This volume contains surveys of current research directions in combinatorics written by leading researchers in their fields **Spatial Agent-Based Simulation Modeling in Public Health** S. M. Niaz Arifin,Gregory R. Madey,Frank H. Collins,2016-04-11 Presents an overview of the complex biological systems used within a global public health setting and features a focus on malaria analysis Bridging the gap between agent based modeling and simulation ABMS and geographic information systems GIS Spatial Agent Based Simulation Modeling in Public Health Design Implementation and Applications for Malaria Epidemiology provides a useful introduction to the development of agent based models ABMs by following a conceptual and biological core model of Anopheles gambiae for malaria epidemiology Using spatial ABMs the book includes mosquito vector control interventions and GIS as two example applications of ABMs as well as a brief description of epidemiology modeling In addition the authors discuss how to most effectively integrate spatial ABMs with a GIS The book concludes with a combination of knowledge from entomological epidemiological simulation based and geo spatial domains in order to identify and analyze relationships between various transmission variables of the disease Spatial Agent Based Simulation Modeling in Public Health Design Implementation and Applications for Malaria Epidemiology also features Location specific mosquito abundance maps that play an important role in malaria control activities by guiding future resource allocation for malaria control and identifying hotspots for further investigation Discussions on the best modeling practices in an effort to achieve improved efficacy cost effectiveness ecological soundness and sustainability of vector control for malaria An overview of the various ABMs GIS and spatial statistical methods used in entomological and epidemiological studies as well as the model malaria study A companion website with computer source code and flowcharts of the spatial ABM and a landscape generator tool that can simulate landscapes with varying spatial heterogeneity of different types of resources including aquatic habitats and houses Spatial Agent Based Simulation Modeling in Public Health Design Implementation and Applications for Malaria Epidemiology is an excellent reference for professionals such as

modeling and simulation experts GIS experts spatial analysts mathematicians statisticians epidemiologists health policy makers as well as researchers and scientists who use manage or analyze infectious disease data and or infectious disease related projects The book is also ideal for graduate level courses in modeling and simulation bioinformatics biostatistics public health and policy and epidemiology *Class Structure in Europe*, 2003 A comparison of these two presidents and presidencies examining their legacies leadership styles and places in history **Mass Customization for Personalized Communication Environments: Integrating Human Factors** Mourlas, Constantinos, Germanakos, Panagiotis, 2009-10-31 This book focuses on the customization of services and communication environments to advance user satisfaction Provided by publisher *CSL '89* Egon Börger, Hans Kleine Büning, 1990-07-10 This volume contains the revised versions of 28 papers presented at the third workshop on Computer Science Logic held in Kaiserslautern FRG October 2 6 1989 These proceedings cover a wide range of topics both from theoretical and applied areas of computer science More specifically the papers deal with problems arising at the border of logic and computer science e g in complexity data base theory logic programming artificial intelligence and temporal logic The volume should be of interest to all logicians and computer scientists working in the above field **Inner Models and Large Cardinals** Martin Zeman, 2002 The series is devoted to the publication of high level monographs on all areas of mathematical logic and its applications It is addressed to advanced students and research mathematicians and may also serve as a guide for lectures and for seminars at the graduate level **Modeling the Effect of Injecting Low Salinity Water on Oil Recovery from Carbonate Reservoirs** Emad W. Al Shalabi, 2014 The low salinity water injection technique LSWI has become one of the important research topics in the oil industry because of its possible advantages for improving oil recovery Several mechanisms describing the LSWI process have been suggested in the literature however there is no consensus on a single main mechanism for the low salinity effect on oil recovery As a result of the latter there are few models for LSWI and especially for carbonates due to their heterogeneity and complexity In this research we proposed a systematic approach for modeling the LSWI effect on oil recovery from carbonates by proposing six different methods for history matching and three different LSWI models for the UTCHEM simulator empirical fundamental and mechanistic LSWI models The empirical LSWI model uses contact angle measurements and injected water salinity The fundamental LSWI model captures the effect of LSWI through the trapping number In the mechanistic LSWI model we include the effect of different geochemical reactions through Gibbs free energy Moreover field scale predictions of LSWI were performed and followed by a sensitivity analysis for the most influential design parameters using design of experiment DoE The LSWI technique was also optimized using the response surface methodology RSM where a response surface was built Also we moved a step further by investigating the combined effect of injecting low salinity water and carbon dioxide on oil recovery from carbonates through modeling of the process and numerical simulations using the UTCOMP simulator The analysis showed that CO₂ is the main controller of the residual oil saturation whereas the low salinity water boosts the oil

production rate by increasing the oil relative permeability through wettability alteration towards a more water wet state In addition geochemical modeling of LSWI only and the combined effect of LSWI and CO₂ were performed using both UTCHEM and PHREEQC upon which the geochemical model in UTCHEM was modified and validated against PHREEQC Based on the geochemical interpretation of the LSWI technique we believe that wettability alteration is the main contributor to the LSWI effect on oil recovery from carbonates by anhydrite dissolution and surface charge change through pH exceeding the point of zero charge

Eclipse Modeling Framework Frank Budinsky, 2004 bull Shows how EMF unifies three important technologies Java XML and UML bull Provides a comprehensive overview of the EMF classes including a complete quick reference for all the classes and methods in the EMF 1.1 API bull Includes examples of many common framework customizations and programming techniques

CSL '87 Egon Börger, Hans Kleine Büning, Michael M. Richter, 1988-09-14 This volume contains the papers which were presented to the workshop Computer Science Logic held in Karlsruhe on October 12-16 1987 Traditionally Logic or more specifically Mathematical Logic splits into several subareas Set Theory Proof Theory Recursion Theory and Model Theory In addition there is what sometimes is called Philosophical Logic which deals with topics like nonclassical logics and which for historical reasons has been developed mainly at philosophical departments rather than at mathematics institutions Today Computer Science challenges Logic in a new way The theoretical analysis of problems in Computer Science for intrinsic reasons has pointed back to Logic A broad class of questions became visible which is of a basically logical nature These questions are often related to some of the traditional disciplines of Logic but normally without being covered adequately by any of them The novel and unifying aspect of this new branch of Logic is the algorithmic point of view which is based on experiences people had with computers The aim of the Computer Science Logic workshop and of this volume is to represent the richness of research activities in this field in the German speaking countries and to point to their underlying general logical principles
