Harford, 2014-05-01 How much cash should a corporation have and should we worry when they have too much This question has been hotly debated by manager and investors recently because managers of many of America's leading corporations have chosen to keep the spoils of the long economic expansion rather than return them to investors As corporate cash coffers burst at the seams some topping 20 billion should investors worry about what managers will do with the cash when they finally decide to spend it This study tackles these and other questions related to corporate cash reserves After developing a benchmark for the appropriate amount of cash a corporation in a given industry needs to fund its investments and survive an economic downturn a group of cash rich corporations are not only more acquisitive than other corporations but they also

tend to make poor acquisition choices effectively squandering part of their cash reserves The stock price reaction to acquisition announcements by cash rich firms is significantly more negative than the reaction to announcements by other firms The performance of the cash rich acquirer declines following the acquisition realizing the expectations of the stock market Overall cash rich firms destroy 7 cents of value for every excess dollar of cash reserves they hold effectively receiving 93 cents on the dollar This study documents that not only do managers tend to squander their stockpiles of cash but also they are able to use this cash to deter any attempt to wrest control of the corporation from their hands The message for investors and board members to be wary of cash stockpiles is clear

**Corporate Cash Management Handbook** Richard Bort,1994-01-01 *Cash Management* Frank J. Fabozzi,2000-09-15 Cash as opposed to more rewarding but riskier assets such as stocks or bonds is preferable for meeting large short term liabilities that are well defined and predictable Holding cash is also the only sensible investment choice for meeting uncertain contingent liabilities that arise in an emergency The range of cash management alternatives is sufficiently wide and complicated to warrant careful planning when deciding on which specific cash vehicles to hold The general principles of modern portfolio management can and should be applied to professional cash management
