methodological problem we lack holistic understanding of how natural language shapes the cognitive domain of human interactions Orthodox linguistic science is based on a premise that language is a tool for expressing and conveying thought thus making communication between humans possible This dualistic assumption ignores the fact that just as there may be no language without interacting human subjects there may be no human thought or largely humanness to speak of without languaging as species specific behavior because we as humans happen in language Maturana The study of language therefore must focus on the dynamics of linguistic interactions and dialogue should be pursued between applied linguists and theoreticians about the conceptual theoretic foundations of linguistic education This volume is just such an attempt
