Written During the Reign of King James the First* Francis Bacon, 1702 Compressed Data Structures for Strings Rossano Venturini, 2013-10-31 Data compression is mandatory to manage massive datasets indexing is fundamental to query them However their goals appear as counterposed the former aims at minimizing data redundancies whereas the latter augments the dataset with auxiliary information to speed up the query resolution In this monograph we introduce solutions that overcome this dichotomy We start by presenting the use of optimization techniques to improve the compression of classical data compression algorithms then we move to the design of compressed data structures providing fast random access or efficient pattern matching queries on the compressed dataset These theoretical studies are supported by experimental evidences of their impact in practical scenarios **A New Concordance to the Holy Scriptures, in a Single Alphabet** John Butterworth, 1851
