Alphabet The A Key To The History Of Mankind:

The Alphabet: a Key to the History of Mankind David Diringer, Reinhold Regensburger, 1968 The Alphabet David Diringer, 1948 *The Alphabet: A Key to the History of Mankind* David Diringer, 2008-06 This scarce antiquarian book is a facsimile reprint of the original. Due to its age it may contain imperfections such as marks, notations, marginalia and flawed pages. The Healing Hand Guido Majno, 1975 This journey to the beginnings of the physician's art brings to life the civilizations of the ancient world: Egypt of the Pharaohs, Greece at the time of Hippocrates, Rome under the Caesars, the India of Ashoka and China as Mencius knew it. Probing the documents and artifacts of the ancient world with a scientist's mind and a detective's eye, Guido Majno pieces together the difficulties people faced in the effort to survive their injuries as well as the odd, chilling or inspiring ways in which they rose to the challenge. In asking whether the early healers might have benefited their patients or only hastened their trip to the grave, Dr. Majno uncovered surprising answers by testing ancient prescriptions in a modern laboratory. Illustrated with hundreds of photographs, many in full color and climaxed ten years of work, *The Healing Hand* is a spectacular recreation of man's attempts to conquer pain and disease.

Inventing the Alphabet Johanna Drucker, 2022-08-08 The first comprehensive intellectual history of alphabet studies, *Inventing the Alphabet* provides the first account of two and a half millennia of scholarship on the alphabet. Drawing on decades of research, Johanna Drucker dives into sometimes obscure and esoteric references, dispelling myths and identifying a pantheon of little-known scholars who contributed to our modern understandings of the alphabet, one of the most important inventions in human history. Beginning with Biblical tales and accounts from antiquity, Drucker traces the transmission of ancient Greek thinking about the alphabet's origin and debates about how Moses learned to read. The book moves through the centuries, finishing with contemporary concepts of the letters in alpha-numeric code used for global communication systems. Along the way, we learn about magical and angelic alphabets, antique inscriptions on coins and artifacts, and the comparative tables of scripts that continue through the development of modern fields of archaeology and paleography. This is the first book to chronicle the story of the intellectual history through which the alphabet has been invented as an object of scholarship.

The Alphabet; A Key to the History of Mankind. Foreword by Sir Ellis Minns David Diringer, 1948 The Alphabet and the Brain Derrick de Kerckhove, Charles J. Lumsden, 2013-04-17 This book is a consequence of the suggestion that a major key to understanding cognition in any advanced culture is to be found in the relationships between processing orthographies, language and thought. In this book, the contributors attempt to take only the first step, namely to ascertain that there are reliable constancies among the interactions between a given type of writing and specific brain processes. And among the possible brain processes that could be investigated, only one apparently simple issue is being explored, namely whether the

lateralization of reading and writing to the right in fully phonemic alphabets is the result of formalized but essentially random occurrences or whether some physiological determinants are at play The original project was much more complicated It began with Derrick de Kerckhove's attempt to establish a connection between the rise of the alphabetic culture in Athens and the development of a theatrical tradition in that city from around the end of the 6th century B c to the Roman conquest The underlying assumption first proposed in a conversation with Marshall McLuhan was that the Greek alphabet was responsible for a fundamental change in the psychology of the Athenians and that the creation of the great tragedies of Greek theatre was a kind of cultural response to a condition of deep psychological crisis

Innis, 2024-06-15T00:00:00Z Based on the original 1951 edition by Canadian professor and author of seminal works on media communication theory and Canadian economic history Harold A Innis d 1952 Innis explores the role of media in shaping the culture and development of civilizations He argued that a balance between oral and written forms of communication contributed to the flourishing of Greek civilization in the 5th century BC But in this ever relevant work he predicted much of what is going on today and warned that Western civilization is now imperiled by powerful advertising driven media obsessed by present mindedness and the continuous systematic ruthless destruction of elements of permanence essential to cultural activity
