Alphonse Laverrière:

Alphonse Laverrière, 1872-1954 Pierre Frey, 1999-01-01 La carrière de cet architecte s'inscrit dans un courant caractérisé par la formation entre 1890 et 1914 à l'Ecole nationale supérieure des Beaux Arts de Paris d'une liste de praticiens suisses qui choisissent de s'installer au pays où ils reproduisent dans l'institution des concours d'architecture les conditions de mutation. L'Ecole Laverrière est un représentant remarquable de ce mouvement qui marque le territoire d'une production eclectique de grande variété stylistique incluant les formes régionalistes et les modes les plus diverses. Sa carrière lui a valu une renommée internationale. The Olympic Art Competitions and Exhibition 1912 to 1952 Wolf Reinhardt, Ralph Schlüter, 2025-08-26 This Book contains all art competitors from 1912 to 1948 and also the exhibitors 1952 at the Olympic Games Volume I contains the categories literature music and architecture Architecture Competitions and the Production of Culture, Quality and Knowledge Jean-Pierre Chupin, Carmela Cucuzzella, Bechara Helal, 2015-01-26 Winner of the 2016 Bronze medal in Architecture Independent Publisher Book Awards This book comprises a series of 22 case studies by renowned experts and new scholars in the field of architecture competition research. In 2015 it constitutes the most comprehensive survey of the dynamics behind the definition organization judging archiving and publishing of architectural landscape and urban design competitions in the world. These richly documented contributions revolve around a few questions that can be summarized in a two-fold critical interrogation: How can design competitions these historical democratic devices both praised and dreaded by designers be considered laboratories for the production of environmental design quality and ultimately for the renewing of culture and knowledge. Includes 340 illustrations bibliographical references and index of over 200 cited competitions. Keywords: Architecture International competitions Architectural judgment Design thinking Digital archiving databases Architectural publications Architectural experimentation Landscape architecture Urban studies *The 1912 Stockholm Olympics* Leif Yttergren, Hans Bolling, 2012-11-19 King Gustaf V of Sweden inaugurated the Fifth Olympiad at the Olympic Stadium in Stockholm on July 6 1912. In the following weeks 2 380 competitors from 27 nations representing six continents participated in well organized competitions in perfect weather conditions. The largest Olympics yet at the time the Stockholm Games have thus gone down in history as the Sunshine Olympics or the Swedish Masterpiece. Since that achievement and despite numerous attempts by other Swedish cities Sweden has not yet managed to host the Olympic Games again. This work examines the 1912 Stockholm Olympics from a variety of perspectives exploring the preparations organization competitions participants and spectators as well as the continuing significance of the 1912 Games to Sweden and to the future of the Olympic movement. *The Formation of the Swiss Hospital System (1840-1960)* Pierre-Yves Donzé, 2022-08-18 This book offers an analysis of the formation of contemporary hospital systems between the mid 19th century and the mid 20th century. Based on extensive archival material and a broad international literature review it focuses on the case of the canton of Vaud Switzerland and uses a triple approach that discusses technological innovations hospital

management and health policy This research is a major contribution to the history of medicine which gives a unique overview of the formation of contemporary hospital systems **Aldo Van Eyck** Robert McCarter, 2015-01-01 Robert McCarter provides a comprehensive study of Aldo van Eyck's 50 year career guiding readers through the architect's buildings and unrealised projects with a focus on the interior spatial experience as well as the design and construction processes He investigates how van Eyck's writings and lectures convey the importance of architecture in the everyday lives of people around the world and throughout history and by presenting the architect's design work together with the principles on which it was founded illuminates van Eyck's ethical interpretation of architecture's place in the world **Architecture**

Competition Ignaz Strebel, Jan Silberberger, 2017-02-24 Much valued by design professionals controversially discussed in the media regularly misunderstood by the public and systematically regulated by public procurement in recent years architecture competitions have become projection screens for various and often incommensurable desires and hopes Almost all texts on architectural competition engage it for particular reasons whether these be for celebration of the procedure or dismissal Moving on from such polarised views Architecture Competition is a revelatory study on what really happens when competitions take place But the story is not just about architecture and design it is about the whole construction process from the definition of the spatial programme to judgement and selection of projects and the realization of the building This book explores the competition in the building process as it takes place but also before and after its execution It demonstrates that competitions are not just one step of many to be taken but that competitive design procedures shape the entire process Along the way the book exposes among others one of the key evolutions of design competitions that competition procedures need to be regulated in order to respond to public awarding rules and need to integrate an increasing amount of given standards regarding for example efficiency fire safety and thermal comfort These notions force competing architects to respond to inflexible and overloaded competition programmes instead of focusing on genuinely crafting an architectural project If the architecture competition wants to be more highly valued as a design tool it should pay attention to the iterative nature of design and to the fact that perspectives on the problem often change in process **Architecture du canton de**

The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
