Effective Learning and Teaching of Writing Gert Rijlaarsdam, Huub Bergh, Michel Couzijn, 2007-11-23 Effective Learning and Teaching of Writing is a handbook on research on the effective teaching and learning of writing It is a reference for researchers and educators in the domain of written composition in education Effective Learning and Teaching of Writing covers all age ranges and school settings and it deals with various aspects of writing and text types Research methodology varies from experimental studies to reflective classroom practitioners research This new volume in the series Studies in Writing brings together researchers from all kinds of disciplines involved in writing research and countries in their endeavour to improve the teaching of written composition It is the result of co operation of researchers all over the world and shows that in spite of the differences in educational regions over the world research in writing shares similar problems and tries to find answers and generate new questions The body of

knowledge in this volume will inspire researchers and teachers to improve research and practice *Global Perspectives on Effective Assessment in English Language Teaching* Fernández Álvarez, Miguel, Montes, Amanda Lira

Gordenstein, 2023-08-25 English language programs depend on the effective assessment of the measure of student proficiency for purposes of placement advancement and completion A variety of approaches may be adopted depending on the program its objectives and the students it serves Teachers and administrators in many contexts may also be required to meet institutional accountability expectations often externally imposed and related to accreditation standards The need for appropriate and accurate assessment of student learning whether internally sought or externally required provides the opportunity for teachers and administrators to consider current practices implement reforms and because of ongoing assessment findings improve student learning through curricular change teacher training and modification of classroom practice *Global Perspectives on Effective Assessment in English Language Teaching* explores approaches models principles and techniques related to effective assessment at the classroom and program levels Covering topics such as language program evaluation curriculum alignment and alternative assessment methods this book is ideal for classroom teachers administrators researchers and students **Balancing Dilemmas in Assessment and Learning in Contemporary**

Education Anton Havnes, Liz McDowell, 2007-11-21 This book focuses on dilemmas inherent in the practice of assessment in the contemporary context New forms of assessment are being introduced in all sectors of education and training and the culture of assessment is shifting The authors in this volume discuss the practice of assessment reporting empirical research on modes of assessment within a variety of educational contexts while also addressing conceptual and theoretical aspects of assessment Though most publications on assessment do not go beyond one sector or phase of education and only consider assessment in one national context this volume is cross sectoral and international in scope This groundbreaking book illustrates the conceptual and practical dilemmas of assessment and raises issues that are relevant and applicable across a variety of modes of assessment and across various contexts where assessment takes place *Handbook of Research Design in Mathematics and Science Education* Anthony Edward Kelly, Richard A. Lesh, 2012-10-12 The Handbook of Research Design in Mathematics and Science Education is based on results from an NSF supported project REC 9450510 aimed at clarifying the nature of principles that govern the effective use of emerging new research designs in mathematics and science education A primary goal is to describe several of the most important types of research designs that have been pioneered recently by mathematics and science educators have distinctive characteristics when they are used in projects that focus on mathematics and science education and have proven to be especially productive for investigating the kinds of complex interacting and adapting systems that underlie the development of mathematics or science students and teachers or for the development dissemination and implementation of innovative programs of mathematics or science instruction The volume emphasizes research designs that are intended to radically increase the relevance of research to practice often by involving

practitioners in the identification and formulation of the problems to be addressed or in other key roles in the research process. Examples of such research designs include teaching experiments, clinical interviews, analyses of videotapes, action research studies, ethnographic observations, software development studies, or curricula development studies, more generally, and computer modeling studies. This book's second goal is to begin discussions about the nature of appropriate and productive criteria for assessing and increasing the quality of research proposals, projects, or publications that are based on the preceding kind of research designs. A final objective is to describe such guidelines in forms that will be useful to graduate students and others who are novices to the fields of mathematics or science education research. The NSF supported project from which this book developed involved a series of mini-conferences in which leading researchers in mathematics and science education developed detailed specifications for the book and planned and revised chapters to be included. Chapters were also field tested and revised during a series of doctoral research seminars that were sponsored by the University of Wisconsin's OERI supported National Center for Improving Student Learning and Achievement in Mathematics and Science. In these seminars, computer-based videoconferencing and www-based discussion groups were used to create interactions in which authors of potential chapters served as guest discussion leaders, responding to questions and comments from doctoral students and faculty members representing more than a dozen leading research universities throughout the USA and abroad. A Web site with additional resource materials related to this book can be found at <http://www.soe.purdue.edu/smsc/lesch>. This internet site includes directions for enrolling in seminars, participating in ongoing discussion groups, and submitting or downloading resources which range from videotapes and transcripts to assessment instruments or theory-based software to publications or data samples related to the research designs being discussed.

Formative and Shared Assessment to Promote Global University Learning Sánchez-Santamaría, José, 2023-07-10. Formative and shared assessment (FSA) implies a radical change in the way in which we understand the meaning and function of the assessment of university learning. In this sense, assessment is learning; it is not only about what the student learns but also about how the student learns. This means that any learning task involves making students aware of what and how they learn and how this learning can be used successfully in the future. Formative and Shared Assessment to Promote Global University Learning offers an updated and comprehensive review of FSA in university teaching from an international perspective. In this regard, this publication provides an update of the concepts and approaches to FSA and suggests a review of the methods, techniques, and instruments of FSA as well as the conditions of validity and reliability to garner high quality. Covering topics such as feminist pedagogies, learning-oriented tasks, and student engagement, this premier reference source is an essential resource for educational administration, libraries, educators of K-12 and higher education, pre-service teachers, government officials, researchers, and academicians.

Improving Assessment through Student Involvement Nancy Falchikov, 2013-04-15. The assessment of students is an activity central to the role of any professional in further and higher education and is an area

that is the subject of constant innovation and debate This book provides a scholarly account of the many facets of assessment with a particular focus on student involvement Peer and self assessment are powerful assessment tools to add to the existing tutor based methods of assessment and feedback and this book is a comprehensive guide to the the methods and issues involved Practical and accessible in style yet grounded in research and rich in evidence based material Improving Assessment Through Student Involvement will be valued by all FE or HE professionals wanting to enhance both the effectiveness and quality of their assessment methods Self, Peer and Group Assessment in E-Learning Roberts, Tim S.,2006-01-31 This book encourages the development of higher quality learning and assessment practices and describes the principal characteristics of self assessment peer assessment and group assessment with guidelines for effective implementation Provided by publisher **Investigating the Role of Test Methods in Testing Reading Comprehension** Jufang Kong,2019-03-27 This book explores the construct of reading comprehension by means of two main test methods Research methods like the think aloud protocol and eye tracking are employed to tap into test takers cognitive processes while engaged in input text meaning building and in test tasks The book is the first systematic attempt to explore test takers cognitive processes through the control of test methods and presents findings in visualized form including processing route maps and eye fixation heat maps It offers readers essential support with digging into and analyzing data that has to date remained difficult to access *Extending the Boundaries of Research on Second Language Learning and Teaching* Mirosław Pawlak,2011-08-30 The book contains a selection of papers reflecting cutting edge developments in the field of learning and teaching second and foreign languages The contributions are devoted to such issues as classroom oriented research sociocultural aspects of language acquisition individual differences in language learning teacher development new strands in second language acquisition research as well as methodological considerations Because of its scope the diversity of topics covered and the adoption of various theoretical perspectives the volume is of interest not only to theorists and researchers but also to methodologists and practitioners and can be used in courses for graduate students Curriculum Studies: Boundaries : subjects, assessment, and evaluation David Scott,2003 *Portfolio Assessment for the Teaching and Learning of Writing* Ricky Lam,2018-06-26 This book provides teachers instructors scholars and administrators with a practical guide to implement portfolio assessment of writing in their work contexts Unlike most existing volumes which underscore theory building it describes and discusses several key issues concerning how portfolio assessment can be carried out in authentic classrooms with a focus on its processes reflective components task types and design scoring methods and actionable recommendations **Higher Education: Handbook of Theory and Research** J.C.
