Contributions from more than 400 investigators address topics such as pharmacological purging marrow processing clinical studies and tumor cell detection Principles of Cancer Biotherapy R.K. Oldham, 2012-12-06 At the time of the first edition of Principles of Cancer Biotherapy this book represented the first comprehensive textbook on biological therapy Whereas in 1991 when the second edition was published there was still some doubt on the part of many oncologists and cancer researchers as to the therapeutic value of these new approaches it is now generally agreed that biopharmaceuticals are producing major opportunities for new cancer therapies Cancer biotherapy has truly matured into the fourth modality of cancer treatment The third edition is now needed as a result of the tremendous progress that has been made in recent years

using biologicals in cancer treatment The book summarizes an evolving science and a rapidly changing medical practice As we near the millennium it now becomes possible to envision a much more diversified system of cancer research and treatment that will afford greater opportunities for patients Some forms of cancer biotherapy use the strategy of tumour stabilization and control through continued biological therapy akin to the use of insulin in the treatment of diabetes This textbook illustrates new methods of thinking and new strategies for control of cancer It is always difficult to move from past dogma to future opportunity but this third edition of Principles of Cancer Biotherapy illustrates why it is so important to the patients for researchers and clinicians to explore and apply these new opportunities in cancer biotherapy

Nance, 2012-12-06 Authoritative experts in transfusion medicine describe in critical detail the most important procedures for obtaining selecting and transfusing red blood cells to patients The topics covered include such key issues as transfusion problems in the immunocompromised the complications of autoantibodies transfusion of infants with hemolytic disease difficulties arising from solid organ transplantation stem cell transfusions and the challenges of massive transfusion Also discussed are the use limitations and alternatives to autogeneic cells long term red cell transfusion the management of adverse reactions to red cell transfusions and the question of blood group antigens and their association with disease and differential diagnosis The book offers transfusion specialists fresh insights and information to maximize and extend their current knowledge **Trigger Factors in Transfusion Medicine** C.Th. Smit Sibinga, P.C. Das, E.L. Snyder, 2012-12-06 It is an honour and a pleasure to welcome you all at this 20th annual International Symposium on Blood Transfusion in the Netherlands This year you celebrate its 20th anniversary and I congratulate the Staff of the Blood Bank Noord Nederland and especially Dr Smit Sibinga for this great achievement As most of you know the name of the person of Dr Smit Sibinga is unbreakably connected with the annual symposium in Groningen which he has organized each year from the very start 20 years ago The reputation of any

symposium depends heavily on the quality of the lectures I think it is not possible to organize 20 symposia in a row if the topics lack actual relevance and the speakers are not of excellent reputation Dr Smit Sibinga has proven to have a keen eye for selecting interesting themes and eminent speakers Although a lot of different topics have been dealt with in the past 20 years which each attracted the attention of a different group in the field of blood transfusion it is not surprising that after a tradition of 20 years several speakers but also a lot of attendees are not for the first time in Groningen to participate in this event It gives the symposium a unique atmosphere of intimacy It is not hard to admit that most of the newer developments in transfusion medicine take place outside the Netherlands
