Maltese and Other Languages Joseph M. Brincat, 2011 Throughout the ages the Maltese language has undergone a series of internal changes as well as modifications and accretions caused by various external forces Internal changes are not easy to date and explain because they require a painstaking comparative exercise that can be carried out only by experts in Semitic languages As a result their systematic description in a historical grammar of Maltese has not yet been published By contrast the external history of Maltese is essentially an account of its contact with various languages All languages are marked by contact albeit to varying degrees Gumperz holds that most words in most modern languages would count as borrowed 1982: 67 but what makes Maltese unique is that it blends together elements from three distinct language families the Semitic the Romance and the Germanic The language spoken in Malta today is the result of a process that has been going on for a thousand years and consequently the account presented in this book will show how social political and cultural events are reflected in the changing face of the language As the lexicon is the most tangible aspect of a language it will naturally be privileged in this account Thanks to its position exactly at the centre of the Mediterranean Sea 90 km from Sicily and 290 km from the Tunisian coast Malta s relations have not been limited to its immediate neighbours Sicily and North Africa Since time immemorial Malta has been at the mercy of all the great naval powers that sailed the Sicilian channel As a result the Maltese language has been shaped by its inhabitants interactions with all the peoples who throughout the centuries have landed on the islands to govern it or establish colonies there In a territory as small as 27 km by 14 km the ratio between the numbers of the rulers and the ruled is highly significant For thousands of years when the inhabitants had to live off the islands resources the size of the population must have been consistently small around 5 000 in all this factor may have allowed the language to be substituted a number of times This may surprise us today but before the Romantic Age people had a very pragmatic view of language Like any other tool language was prized mostly for its efficiency The population of the Maltese islands has multiplied in the past one thousand years rising to around 400 000 and such a rapid increase in such a small place could not fail to exert a strong influence on the linguistic scenario The increase in population was due not only to natural growth but also to cumulative waves of settlers from abroad Social

interaction between the locals and the visitors was strong bilingual communication took place in various domains at all social levels and relations were especially strong when mixed marriages took place For this reason a history of the Maltese language must be seen in the wider context of a linguistic history of the Maltese islands and will offer linguists belonging to both the historical and typological fields an intriguing case study of what can be considered a minor language from the international point of view used only in a small state but spoken by the great majority of the islanders which has managed to survive alongside a series of major languages such as Arabic Latin Sicilian Italian and English languages which were widely spoken and written abroad and which also enjoyed prestige in Malta itself but whose local circulation was generally limited to the literate minority
