Gender, Genre & Narrative Pleasure Derek Longhurst, 2012-08-21 Recent years have witnessed important new initiatives in the study of popular fictional modes of writing At one time the field could have been described with reasonable accuracy by two traditions one that analyzed the production and distribution of popular fiction as commodities and one whose proponents regarded popular fiction as the negative which offered definition to the exposure of the positive the great canonic literary tradition Generally then popular fictions were to be evaluated according to the institutionalized norms which had been established as common sense practice around literary studies The decade of the 1970s however ushered in a bewildering range of theoretical debates a crucial gain was establishment of interdisciplinary courses in communication cultural and media studies providing a network of contexts within which serious analysis could evolve and progress Responding to a fundamental challenge from feminism a primary objective of this book is to propose that all narrative and its reading are intrinsically inflected by sexual politics Various approaches represented here demonstrate problems of confronting the gendered pleasures of reading Questions about self sexuality and identity within specific historical formations are raised The objective is to frame describe and unearth the notion of men as readers as a project

rather than as the usual unquestioned normative procedure Drawing eclectically upon Marxist psychoanalytic and discourse theory the essays set out readings of popular texts and genres the Western the sentimental novel detective and crime fiction political thrillers and horror and science fiction in the interest of provoking other readers to see the critical study of popular fiction as unthinkable without gender as a central concern

towns Domestic publication in French also occurred in Dublin Cork and Belfast The provincial cities too had a role to play in the distribution of French language material opening up new markets in the smaller towns using regional newspaper advertising and selling by catalogue Questions of literacy and readership are explored with particular emphasis on the teaching of French indentifying teachers and schools throughout the country The huguenot contribution is outlined especially their role in the publication of French language books in the first half of the century Many Catholics received their education in Francophone countries returning to Ireland with advanced French language skills In elite circles the French language was a fashionable accomplishment This work draws on comparable studies in Britain France and Germany to place Irish readership of French language materials in the broader context The picture that emerges shows Irish readers as active participants in the cosmopolitan culture which flourished in eighteenth century Europe *The Early Poetry of Charles Wright* Robert D.
