hybrid Englishes and the bilingual creativity manifested by the vibrant creative writing found in a swathe of Asian societies. This book gives an in depth analysis of the use of the English language in modern Japan. It explores the many ramifications the Japanese English language and culture contact situation has for not only Japanese themselves but also others in the international community. Data for this book has been gathered using anthropological ethnographic fieldwork augmented by archival sources, written materials and items from popular culture and the mass media. An interdisciplinary approach including those of anthropological linguistics, sociolinguistics, cognitive science and symbolic anthropology is taken in the exploration of the topics here. This book's arguments focus on four major theoretical linguistic and social issues, namely the place of the Japanese English case in the larger context of World Englishes, the place of the Japanese English case in a general theory of language and culture contact, how Japanese English informs problems of categorization, meaning, construction and cognition, and what it says about the social construction of identity and sense of self, nationalism and race. This book will be of interest to linguists, anthropologists, sociologists, cognitive scientists and all readers who are interested in language contact, sociolinguistics, English as an international language and World Englishes. It will also appeal to those who are interested in Japan and popular culture.

**Sandalwood and Carrion** James McHugh, 2012-11-29 James McHugh offers the first comprehensive examination of the concepts and practices related to smell in pre-modern India. Drawing on a wide range of textual sources from poetry to medical texts, he shows the deeply significant religious and cultural role of smell in India throughout the first millennium CE. McHugh describes sophisticated arts of perfumery developed in temples, monasteries and courts which resulted in worldwide ocean trade. He shows that various religious discourses on the purpose of life emphasized the pleasures of the senses, including olfactory experience as a valid end in themselves. Fragrances and stench were analogous to certain values, aesthetic or ethical, and in a system where karmic results often had a sensory impact where evil literally stank, the ethical and aesthetic became difficult to distinguish. Sandalwood and Carrion explores smell in pre-modern India from many perspectives, covering such topics as philosophical accounts of smell perception, odors in literature, the history of perfumery in India, the significance of sandalwood in Buddhism and the divine offering of perfume to the gods.
