Coping With Children's Temperament A Guide For Professionals:

Coping With Children's Temperament William B. Carey, Sean McDevitt, 1995-08-25 Why does one child and not another in a normal family develop a behavior problem If a child is sensitive and likely to complain how does that affect the quality and quantity of the medical care provided What happens to the neurologically intact child who has trouble paying attention in school Children's temperaments make a substantial contribution to their environments and their interactions with them Certain of these largely inborn behavioral style differences which are not abnormal in themselves may lead to clinical problems by predisposing children to abrasive incompatible relationships with caregivers In this book William B Carey and Sean C McDevitt present a clear concise summary of the recent clinical research on temperament in particular from the last ten years coupled with practical suggestions on how to use this information in a variety of clinical and educational settings These management strategies were assembled from their own extensive clinical experience and that of others They take the professional psychologist physician nurse teacher day care worker and social worker through all the stages of a child's life to show how the effects of temperament play out in infancy the preschool years middle childhood and adolescence Richly illustrated with detailed case examples this outstanding book brings theory and practice to life and shows how all who work with children can improve their care by understanding these important differences *Understanding Your Child's*

Temperament William B. Carey, 2004-12 UNDERSTANDING YOUR CHILD'S TEMPERAMENT From their earliest days some children are shy and others are bold A brother may be flexible while his sister is rigid One child is highly active another far less so One may stick with a challenge for hours while another gives up easily All children display distinct profiles of nine largely inborn temperament traits that determine how they experience their environments and respond to them These interactions have a major impact on children's physical health development social behavior and school performance and on the caregivers themselves If adults learn to recognize and tolerate temperament traits they will be able to manage them more harmoniously and care for each child's individual needs What an important book for parents to consider Treating each child as an individual shows them the respect that will engender self esteem in them later This book about differences in temperament by Dr William Carey an esteemed pediatrician will give parents the backup they need to treat each child individually T Berry Brazelton M D Emeritus Professor of Pediatrics Harvard Medical School Author of numerous books on child development and care America's favorite pediatrician This classic work is now more useful than ever The too often neglected role of temperamental patterns is explained brilliantly so that all adults who live or work with kids can understand and manage these all important differences between them Mel Levine M D Professor of Pediatrics University of North Carolina Medical School Author of national bestseller *A Mind at a Time* and 10 other books about children's learning issues

Aylward,2012-12-06 Over the last 25 years of clinical practice I have been impressed with a paradox namely the uniqueness in each child in contrast to the frequent commonalities found in the development of behavioral problems I have also been duly impressed with the resilience of children and their families and the impact that provision of knowledge regarding development and behavior can have on facilitating this resilience Guidance provided by the practitioner to caretakers can have a tremendous influence in altering the of a behavioral concern particularly if this guidance is provided course early in the evolution of the potential problem and is directed toward skill development in the parents Moreover if parents can be provided with basic principles of behavior and are able to self monitor their reactions to the behaviors of their child the likelihood of a positive outcome is enhanced With these considerations in mind the purpose of this book is two fold First it provides a quick reference for the practitioner regard ing parenting child development and conceptualizing identifying and treating behavioral concerns The text is geared to be a practical quick read which the practitioner can use in anticipatory guidance or first tier interventions The second purpose is to provide a reference for parents More specifically clinicians may recommend the book to parents as a so called bibliotherapeutic aid either to be read independently or used in conjunction with an intervention program provided by the practitioner **Temperament** Diana Wright Guerin,Allen W.

Gottfried,Pamella H. Oliver,Craig W. Thomas,2012-12-06 Your good nature will bring you much happiness Peking Noodle Co We began this book with the belief that there are individual differences in tempera ment that impact the trajectory of the course of development At a particular point in time the impact may be small but over time the effect of these small tweaks

may come to be associated with significant and meaningful differences in our individual destinations In this book we examined the relations between temperament and various domains of development as well as the home and family environment to document the short and long term sequelae of various temperamental characteristics to test this belief It takes a certain temperamental profile to complete a collaborative longitudinal research project spanning two decades Especially during the project's early years when we were directly assessing the development of over 100 children twice yearly and visiting their homes high activity level was required Our biological rhythms were constantly disrupted as we worked to complete data coding we used punch cards then and checking before the next wave of assessments began We learned to approach new problems and tasks with intensity to be adaptable when appointments had to be rescheduled to be sensitive to changes in our study families situations and that a positive mood is essential We were not easily distracted from our goal of following the study participants through high school completion and our persistence has made all the difference
