Children and the Changing Family An-Magritt Jensen,Lorna McKee,2003-12-08 This timely and thought provoking book explores how social and family change are colouring the experience of childhood The book is centred around three major changes parental employment family composition and ideology The authors demonstrate how children s families are transformed in accordance with

societal changes in demographic and economic terms and as a result of the choices parents make in response to these changes. Despite claims that society is becoming increasingly child centred, this book argues that children still have little influence over the major changes in their lives. This book breaks new ground by researching family change from the child's point of view. Through combinations from childhood experts in Scandinavia, the UK and America, the book shows the importance of studying children's lives in families in order to understand how far children are active agents in contemporary society. Students of childhood studies, sociology, social work and education will find this book essential reading. It will also be of interest to practitioners in the social child and youth services.

Coping with Chronic Stress Benjamin H. Gottlieb, 2013-11-21. Much of what we know about the subject of coping is based on human behavior and cognition during times of crisis and transition. Yet the alarms and minor upheavals of life comprise only a portion of those experiences that call for adaptive efforts. There remains a vast array of life situations and conditions that pose continuing hardship and threat and do not promise resolution. These chronic stressors issue in part from persistently difficult life circumstances, roles and burdens, and in part from the conversion of traumatic events into persisting adjustment challenges. Indeed, there is growing recognition of the fact that many traumatic experiences leave a long lasting emotional residue. Whether or not coping with chronic problems differs in form, emphasis or function from the ways people handle acute life events and transitions is one of the central issues taken up in these pages. This volume explores the varied circumstances and experiences that give rise to chronic stress, as well as the ways in which individuals adapt to and accommodate them. It addresses a number of substantive and methodological questions that have been largely overlooked or sidelined in previous inquiries on the stress and coping process.

There are five primary parts within this book, each of which looks at numerous facets of fatherhood in the twenty-first century.
