as you move towards the time when you become new parents for the first the second or the umpteenth time *The Medical Directory ...*, 1993 *Understanding Anxiety, Worry and Fear in Childbearing* Kathryn Gutteridge, 2019-11-04 This book informs and enlighten health professionals on how the recognition of fearing women can change their episode of care during childbearing It gives practical advice on the way women present to services and the challenges that this invokes This work is the first of its kind aimed at clinicians to deconstruct ideology around childbearing myths and its challenges The authors review the evidence that exists and how modern maternity systems are responding to fear and shaping healthcare Whilst some worry and anxiety is expected and indeed considered normal during childbearing it has been suggested that this has now proliferated to a degree of abnormal for many women Why is that and how is this panic spread Media portrayal of birth is suggested as unrealistic material and to show only that which is dramatic and horrific This has been considered as one factor influencing modern women Medicalisation technology and demand upon services is another consequence of providing almost all maternity care in hospitals Given that the majority of childbearing women are fit and healthy is this another causative factor By removing women from their homes and families at such a vulnerable time has a serious consequence for how she will experience her greatest leap of faith into motherhood All of these issues are explored and examined in the book with ideas and practical suggestions of what may be done to change this increasingly common problem This book is intended at midwives and clinicians working in maternity settings
