Core Vs Periphery Migration To And Within Israel 1948 1995:

Country on the Move: Migration to and within Israel, 1948-1995 Gabriel Lipshitz, 2013-03-14 *Country on the Move* presents original research and a comprehensive multidisciplinary analysis of the spatial aspects of migration. It considers the spatial results of two diametrically opposed policies: planning from above to settle the North African and Asian newcomers in the 1950s and planning by market forces for immigrants from the former Soviet Union in the 1990s. Unlike other books on immigration, *Country on the Move* also analyzes internal migration within Israel, which is an outcome of the regional disparities produced by immigration. Moreover, it compares the empirical findings in Israel with international trends, and its analysis can serve as a foundation for setting spatial immigration policy. Audience: Researchers specializing in population geography, migration and regional development; university students on all levels who are taking courses in these subjects; and top officials in government ministries that deal with immigration. *The Arid Frontier* Hendrik J. Bruins, Harvey

Lithwick, 2012-12-06 The arid frontier has been a challenge for humanity from time immemorial. Drylands cover more than one third of the global land surface distributed over Africa, Asia, Australia, America, and Southern Europe. Disasters may develop as a result of complex interactions between drought, desertification, and society. Therefore, proactive planning and interactive management, including disaster coping strategies, are essential in dealing with arid frontier development. This book presents a conceptual framework with case studies in dryland development and management. The option of a rational and ethical discourse for development that is beneficial for both the environment and society is emphasized, avoiding extreme environmentalism and human destructionism, combating both desertification and human livelihood insecurity. Such development has to be based on appropriate ethics, legislation, policy, proactive planning, and interactive management. Excellent scholars address these issues, focusing on the principal interactions between people and dryland environments in terms of drought, food, land, water, renewable energy, and housing. Audience: This volume will be of great value to all those interested in Dryland Development and Management: professionals and policy makers in governmental, international, and non-governmental organizations; NGOs; as well as researchers, lecturers, and students in Geography, Environmental Management, Regional Studies, Development, Anthropology, Hazard and Disaster Management, Agriculture and Pastoralism, Land and Water Use, African Studies, and Renewable Energy Resources. **Human Activities and the Tropical Rainforest** Bernard K.

Maloney, 2013-11-11 Arising initially from a conference, the papers published here have been integrated into book form to provide information on human activities and the tropical rainforest in the past and present and on the possible future of the rainforest in a unique way. Other books have considered some but not all of these themes; however, none has stressed the continuity of change over time and its possible outcome for the people of the forest as well as for the forest itself. Because of the approach taken, this book should appeal across traditional disciplinary boundaries. Indeed, a prime aim has been to suggest that rainforest, because of its complexity and the complexity of people-rainforest relationships throughout time

deserves study from a broad perspective This book poses more questions than answers about the rainforest and it is hoped that it will encourage readers to think about the rainforest in a wider way than hitherto This book is aimed at geographers physical and human social anthropologists archaeologists pedologists foresters and tropical botanists and will be of value to graduates of various disciplines setting out to research the rainforest **Israel Yearbook and Almanac** ,1998

Interregional Inequalities in Israel Boris Adol'fovich Portnov,2003 International Books in Print ,1986 **Urban Clustering** Boris Adol'fovich Portnov,Evyatar Erell,2001 The effects of spatial location on socio economic development is a critical issue in urban and regional planning This comprehensive work examines the success or failure of an urban place in relation to the spatial characteristics of the urban cluster to which it belongs Employing case studies from a variety of countries it analyzes relationships between the clustering of towns and their attractiveness to migrants and investors In addition it provides a fundamental overview and critical analysis of basic concepts in the field of urban and regional location introducing new methods for assessing the sustainability of urban growth in central and peripheral regions The book also proposes planning strategies designed to enhance the potential of urban growth **Desert Regions** Boris A. Portnov,A. Paul Hare,2012-12-06 Despite the common understanding of the importance of desert development in the contemporary world there are relatively few books published to date on this sub ject The books and collective volumes published in this field deal primarily with environmental and physical aspects of desert development such as soil agricul ture vegetation water resources etc In contrast this book addresses the issues of regional and urban development in desert areas which have not been given sufficient attention The present book is socially oriented It considers physical development of desert regions not as an end in itself but rather as an essential precondition for creating socially attractive and desirable environments for human settlement The book addresses the issues of desert development at three distinctive conceptual levels region urban envi ronment and building and deals with both cold and hot deserts Approximately half of the chapters in this book are original contributions that have not been published elsewhere The remaining chapters fall into two groups 1 chapters which have been reprinted from various refereed journals and 2 chapters initially printed elsewhere and revised by their respective authors specifi cally for this collective volume In the former case permission to reproduce the material has been obtained from the respective copyright holders and the details of original publication and names of copyright holders are indicated in footnotes Geography Research Forum ,1997 **Human Mobility in Coastal Regions** Allan M. Williams,2012-12-31 The broad aim of this book is to examine human mobility urbanization relationships as the unit of analysis within the framework of the natural environment of the coastal areas with a focus on unfolding major conflict categories themes The book does not address the question of how urbanization shapes mobility this lies outside the project specification that this book is based on as approved by the EU Therefore the analysis of how different urban forms such as the compact city shape mobility are not considered here Instead the book has four specific research objectives that structure this overview chapter

and the national case studies presented in the remainder of the book I To analyze the relationships between migration and urban change II To analyze the spatial and temporal balance between permanent versus temporary populations in the core v ring v coastal zone III To analyse how human mobility shapes key aspects of urbanization IV To consider the main human environmental conflicts resulting from human mobility The final section reflects on the implications for human environmental conflicts of the changing relationship between mobility and urbanization in the case studies

Still Moving Daniel Judah Elazar, The aftermath of World War II was a period of massive Jewish migration More than a million Jews came to settle in the new state of Israel hundreds of thousands moved to North America Australia and France while tens of thousands resettled themselves elsewhere in Europe and the world Emigration was in turn paralled by large scale movement among second generation Jews from the great urban centers to the suburbs Until recently it has seemed as though the Jewish people had in the words of the Bible reached a situation of rest and landed inheritance However there is considerable evidence that Jews are still moving from the former Soviet Union to and from Israel and within nations where they have been long resident Still Moving examines the causes and character of contemporary migration in Israel and throughout the Diaspora The contributors to this volume adopt a cross cultural comparative approach Part 1 establishes the context of the new migration globally with specific concentration on its effects on the institutions of Israeli democracy Part 2 surveys immigration to Israel in the 1990s with particular emphasis on the wave of Russian emigres since the fall of the Soviet Union Internal migration from rural to urban centers is also explored Migration to the Diaspora is covered in part 3 The Jewish identity of Soviet Jews is compared to their American and Canadian counterparts Economic performance and problems of multigenerational families among emigres are also treated as are the controversies surrounding politically motivated emigration from Israel Part 4 focuses on the changing nature of the Diaspora and its relations with Israel Beyond its grounding in Jewish culture and history Still Moving frames questions that are central to understanding contemporary migration in general Does immigration accelerate or retard the abilities of host countries to restructure economically How does greater ethnic diversity affect the social and cultural life of cities What factors help immigrants integrate into the wider community Does immigration contribute to the creation of a marginalized underclass Still Moving will be essential reading for historians sociologists Jewish studies specialists and policy analysts

American Book Publishing Record ,1998 **Экономика Израиля в 90-е годы** : Евгений Янович Сатановский,1999 *Environment and Planning* ,2003 Publishes interdisciplinary research on issues of Government and Policy with an international perspective Committed to a broad range of policy questions not just those related to government and public policy Topics covered include nonstate agents private public collaboration and NGOs nongovernmental organisations All areas of economic social and environmental institutions and policy are included Disciplines from which papers are derived include political science planning geography economics law sociology and public administration

The Mosaic of Israeli Geography Y. Gradus,Gabriel Lipshitz,1996 **The Challenge of Urbanization**

,1995 From Abidjan to Yangon in hundreds of other urban places around the world cities face the challenge of urbanization This extensive study describes 100 cities highlighting their population characteristics economy infrastructure social services planning issues Each city is introduced with a map that shows its location on the globe a short summary of notable historical geographical features **Forthcoming Books** Rose Arny,1998-06 *Surveillance and Control in Israel/Palestine* Elia Zureik,David Lyon,Yasmeen Abu-Laban,2010-12-13 Surveillance is always a means to an end whether that end is influence management or entitlement This book examines the several layers of surveillance that control the Palestinian population in Israel and the Occupied Territories showing how they operate how well they work how they are augmented and how in the end their chief purpose is population control Showing how what might be regarded as exceptional elsewhere is here regarded as the norm the book looks not only at the political economy of surveillance and its technological and military dimensions but also at the ordinary ways that Palestinians in Israel and the occupied territories are affected in their everyday lives Written in a clear and accessible style by experts in the field this book will have large appeal for academic faculty as well as graduate and senior undergraduate students in sociology political science international relations surveillance studies and Middle East studies The Cambridge Survey of World Migration Robin Cohen,1995-11-02 This extensive survey of migration in the modern world begins in the sixteenth century with the establishment of European colonies overseas and covers the history of migration to the late twentieth century when global communications and transport systems stimulated immense and complex flows of labour migrants and skilled professionals In ninety five contributions leading scholars from twenty seven different countries consider a wide variety of issues including migration patterns the flights of refugees and illegal migration Each entry is a substantive essay supported by up to date bibliographies tables plates maps and figures As the most wide ranging coverage of migration in a single volume The Cambridge Survey of World Migration will be an indispensable reference tool for scholars and students in the field *Boundaries in Flux* David Newman,1995
