The Kingfish in Fiction Keith Perry, 2004-06-01 The controversial almost mythic Louisiana politician Huey P Long inspired not just one but six American novels published between 1934 and 1946 And he continues to resonate in American cultural memory appearing in a 1995 work of historical fiction The Kingfish in Fiction offers the first study of all six Hueys who aren't Hueys as they strut and bluster their way across the literary page each character with his own particular story each towing a different authorial agenda Keith Perry carefully dissects the intertwining of documented history and artistic invention in Sinclair Lewis's It Can't Happen Here Hamilton Basso's Cinnamon Seed and Sun in Capricorn John Dos Passos's Number One Adria Locke Langley's A Lion Is in the Streets and Robert Penn Warren's All the King's Men Perry explains that Lewis cast his version of the Kingfish as a totalitarian menace a sort of homegrown Hitler in what Lewis later admitted was an unapologetic attempt to sabotage Long's designs on the White House Basso one of Long's most vocal detractors created two Long-based characters each a rabble rousing affront to what remained of the Old South order To warn readers of the dangers hidden in the politician constituent contract Dos Passos transformed Long into a shameless manipulator of the gullible American masses Langley's rendition suffers complete condemnation by its creator for personal as well as public transgressions Warren's spellbinding Willie Stark almost as much philosopher as politician ironically bears the least resemblance to Long though for almost six decades Stark has been Long's best known fictional embodiment Exploring how and why these five authors among them a Nobel laureate one of America's most celebrated political novelists and a two-time Pulitzer Prize winner turned one politician into six fictional characters leads Perry to conclude that Huey P Long's lasting impression may well be a composite of both historical and imaginative interpretation The Story of Corn Betty

The emergence of American English as a discursive variety Ingrid Paulsen, 2022 Do speakers' identity constructions influence the emergence of new varieties of a language This question is at the heart of a debate about how the process of the emergence of postcolonial varieties of English can best be modeled This volume contributes to the debate by linking it to models and theories proposed by anthropological linguists sociolinguists and discourse linguists who view identity as a social and cultural phenomenon that is produced through linguistic and other social practices Language is seen as essential for identity constructions because speakers use linguistic forms that index social personae as well as specific social practices and values to convey an image of self to other speakers Based on the theory of enregisterment that models the cultural and discursive process of the creation of indexical links between linguistic forms and social values the argument is made that any model of the emergence of new varieties needs to differentiate carefully between a structural level and a discursive level What emerges on the discursive level as a result of processes of enregisterment is a discursive variety The volume illustrates how the emergence of a discursive variety can be systematically studied in a historical context by focusing on the enregisterment of American English as it can be observed in nineteenth century U S newspapers Using a discourse linguistic methodological framework and two large databases containing close to 78 million newspaper articles the study reveals a complex pattern of indexical links between the phonological forms *h* dropping and insertion *yod* dropping a lengthened and backened bath vowel non rhoticity a realization of prevocalic *r* as a labiodental approximant as well as the lexical items *baggage* and *pants* on the one hand and social values centering around nationality authenticity and non specificity on the other hand Qualitative analyses uncover the social personae associated with the

linguistic forms e g the American cowboy the African American mammy and the Anglo maniac American dude while quantitative analyses trace the development over time and show that the enregisterment processes were widespread and not restricted to a particular region
