Lexis and Creativity in Translation Dorothy Kenny, 2014-04-08 Computers offer new perspectives in the study of language allowing

us to see phenomena that previously remained obscure because of the limitations of our vantage points. It is not uncommon for computers to be likened to the telescope or microscope in this respect. In this pioneering computer-assisted study of translation, Dorothy Kenny suggests another image: that of the kaleidoscope. Playful changes of perspective using corpus processing software allow textual patterns to come into focus and then recede again as others take their place. And against the background of repeated patterns in a corpus, creative uses of language gain a particular prominence. In *Lexis and Creativity in Translation*, Kenny monitors the translation of creative source text word forms and collocations uncovered in a specially constructed German-English parallel corpus of literary texts. Using an abundance of examples, she reveals evidence of both normalization and ingenious creativity in translation. Her discussion of lexical creativity draws on insights from traditional morphology, structural semantics, and most notably, neo-Firthian corpus linguistics, suggesting that rumours of the demise of linguistics in translation studies are greatly exaggerated. *Lexis and Creativity in Translation* is essential reading for anyone interested in corpus linguistics and its impact so far on translation studies. The book also offers theoretical and practical guidance for researchers who wish to conduct their own corpus-based investigations of translation. No previous knowledge of German corpus linguistics or computing is assumed.

Extending the Scope of Corpus-Based Translation Studies Sylviane Granger, Marie-Aude Lefer, 2022-01-27. With the rapid growth of corpus-based translation studies (CBTS) over recent years, this book offers a timely overview of the field today. It features cutting-edge studies from leading experts in the area, focused on both professional and student translations, and covers the latest theoretical developments such as the constrained communication framework with a strong focus on methodology, particularly mixed-method approaches, multivariate research designs, and translation error annotation. The volume highlights the emerging interdisciplinary bridges between CBTS and other areas in linguistics and demonstrates the applications of these theories and methods to translator training. It also offers a forward-looking perspective by presenting some of the challenges CBTS currently faces and possible pathways for future research. Thanks to its combined theoretical, methodological, and applied perspective and innovative approaches, *Extending the Scope of Corpus-Based Translation Studies* will appeal to both seasoned specialists and newcomers to the field.

New Insights into Corpora and Translation Daniel Gallego-Hernández, 2016-05-11. This publication brings together some of the papers presented at the 4th International Conference on Corpus Use and Learning to Translate (CULT), which took place at the University of Alicante on 27-29 May 2015, organised by the University's Department of Translation and Interpreting. Spanish and international researchers, translator trainers and trainees, and professional translators gathered at the conference in order to further their knowledge of corpus use, translation training, and professional practice. The book includes contributions on the use of multilingual corpora in teaching scientific translation, transcollocations in parallel corpora, teaching and learning the language of tourism as a Language for Specific Purposes (LSP), and a collocational analysis of verb work in a specialised corpus of English non-financial reports, among others.

Semantic

differences in translation Lore Vandevorde ,2020 Although the notion of meaning has always been at the core of translation the invariance of meaning has partly due to practical constraints rarely been challenged in Corpus based Translation Studies In answer to this the aim of this book is to question the invariance of meaning in translated texts if translation scholars agree on the fact that translated language is different from non translated language with respect to a number of grammatical and lexical aspects would it be possible to identify differences between translated and non translated language on the semantic level too More specifically this books tries to formulate an answer to the following three questions i how can semantic differences in translated vs non translated language be investigated in a corpus based study ii are there any differences on the semantic level between translated and non translated language and iii if there are differences on the semantic level can we ascribe them to any of the universal tendencies of translation In this book I establish a way to visually explore semantic similarity on the basis of representations of translated and non translated semantic fields A technique for the comparison of semantic fields of translated and non translated language called SMM based on Helge Dyvik s Semantic Mirrors method is developed yielding statistics based visualizations of semantic fields The SMM is presented via the case of inchoativity in Dutch beginnen to begin By comparing the visualizations of the semantic fields on different levels translated Dutch with French as a source language with English as a source language and non translated Dutch I further explore whether the differences between translated and non translated fields of inchoativity in Dutch can be linked to any of the well known universals of translation The main results of this study are explained on the basis of two cognitively inspired frameworks Halverson s Gravitational Pull Hypothesis and Paradis neurolinguistic theory of bilingualism *Information Technology Applications in Industry II* Prasad Yarlagadda,Su Fen Yang,Keon Myung Lee,2013-09-03 Selected peer reviewed papers from the 2013 2nd International Conference on Information Technology and Management Innovation ICITMI 2013 July 23 24 2013 Zhuhai China *Corpus Linguistics and Translation Tools for Digital Humanities* Stefania M. Maci,Michele Sala,2022-07-14 Presenting the digital humanities as both a domain of practice and as a set of methodological approaches to be applied to corpus linguistics and translation chapters in this volume provide a novel and original framework to triangulate research for pursuing both scientific and educational goals within the digital humanities They also highlight more broadly the importance of data triangulation in corpus linguistics and translation studies Putting forward practical applications for digging into data this book is a detailed examination of how to integrate quantitative and qualitative approaches through case studies sample analysis and practical examples
