German Late War Armored Fighting Vehicles George Bradford, 2007-02-07 This work is filled with fine scale drawings of Germany's late war armoured vehicles including Panther Tiger Elephant Jagdtiger and dozens more **Armored fighting Vehicles of Germany**, 1978 *German Military Vehicles of World War II* Jean-Denis G.G. Lepage, 2014-11-18 This volume presents a cross section of the most common transport vehicles produced and used by the German army Tanks plus auxiliary vehicles such as cars motorcycles vans ambulances trucks and tractors made it possible for the troops to keep moving These lightly armored or unarmored vehicles aka soft skins operated behind the front lines maintaining supply lines connecting armies with their home bases and ultimately determining the outcome of battle Beginning with the development of military vehicles in the early 1930s this volume discusses the ways in which this new technology influenced and to some extent facilitated Hitler's program of rearmament Nomenclature standard equipment camouflage and the combat roles of the various vehicles are thoroughly examined Individual vehicle types are arranged and discussed by the following classifications cars and motorcycles trucks and tractors half tracks and wheeled combat vehicles Accompanied by well researched detailed line drawings each section deals with a number of individual vehicles describing their design manufacture and specific use

German Heavy Fighting Vehicles of the Second World War Kenneth W. Estes, 2018-04-17 The German army faced tanks of superior size armor and firepower from the outset of World War II Although their Panzerwaffen handled the Polish campaign war with France meant confronting superior heavy and medium tanks like the Char B and Somua with 47 mm high velocity cannon that penetrated German tank armor with ease French infantry disposed of effective antitank weapons and a portion of their 75 mm field guns were detailed as antitank guns Even greater challenges emerged with the Russo German War for the Germans had no initial answer to the KV 1 heavy tank and T 34 medium The successive technical shocks of superior tanks introduced by each side produced a gun armor race that continued in some manner even after the war's end The Germans placed a premium on technological quality and superiority over mass production for which their industry and arguably their regime remained rather unsuited Not satisfied with the advantage they obtained with the Tiger and Panther series tanks the army leadership and Adolf Hitler himself pushed for larger and more powerful tanks than had ever been built

Atrocities such as the sacking of Magdeburg in 1631 where more than 30 000 people were killed were embedded in the German consciousness 4 All told 8 million people died during the Thirty Years War Likewise the Napoleonic Wars fought about 150 years later appeared to confirm these fears The French Revolution had terrified similar royal regimes in other European empires and as the revolution took on ever bloodier connotations other countries were drawn into conflict with the new French Republic with the Holy Roman Empire on the front line of the revolutionary wars Napoleon Bonaparte earned his reputation with a number of victories on the battlefield and rose to the pinnacle of power in France As the French emperor his reign was characterized by a more aggressive military strategy and the rapid annexation of much of Europe [A Report on the U.S. Army's International Cooperative Programs](#) ,1995
