

Arms Sales as a Foreign Policy Tool

Introduction

The trade in armaments has existed since at least the mid-19th century. As mass production and industry modernisation allowed huge strides in the production of weaponry, the domestic production in less developed nations could not maintain a technological edge over competitors and so relied on the importation of weapons from other nations. The trade in arms was initially a tool used in both forming new and cementing current relationships; but as the Soviet Union and United States entered the Cold War the two powers began exporting large amounts of arms into proxy wars hoping to offset each other's influence.

It is important to differentiate in the dual nature of arms deals. That is, arms deals are both an economic and political tool. The economic side of arms deals is that they can be used to bolster the budget of a nation's defense spending and are a lucrative source of income if a nation has the capacity to produce modern arms domestically. The political side pulls more on how arms deals can be used to establish diplomatic relations and strengthen an ally, or how arms deals are used to indebted and/or manipulate the client to suit the foreign policy aims of the seller. This paper will focus mostly on the political nature of arms deals, but where applicable the economic nature of arms deals will be examined.

Arms deals are an incredibly effective tool in foreign policy for three key reasons: firstly, supplying weapons to a client who is politically or ideologically aligned with the supplier, can be considered as an exportation of security and defense. Secondly, more advanced technology often requires maintenance and operation by the seller, thus the buyer must maintain good relations with the seller or face withdrawal of maintenance and operation; lastly, larger arms deals often cost the buyer billions of dollars, creating a

Arms Sales, a Useful Foreign Policy Tool? John Charles Daly, Les Aspin, 1982 American Arms Supermarket
Michael T. Klare, 2014-06-30 U S arms sales to Third World countries rapidly escalated from 250 million per year in the 1950s and 1960s to 10 billion and above in the 1970s and 1980s But were these military sales so critical in their impact on Third World nations and on America's perception of its global role achieving the ends and benefits attributed to them by U S policymakers In American Arms Supermarket Michael T Klare responds to this troubling still timely question with a resounding no showing how a steady growth in arms sales places global security and stability in jeopardy Tracing U S policies practices and experiences in military sales to the Third World from the 1950s to the 1980s Klare explains how the formation of U S foreign policy did not keep pace with its escalating arms sales how instead U S arms exports proved to be an unreliable instrument of policy often producing results that diminished rather than enhanced fundamental American interests Klare carefully considers the whole spectrum of contemporary American arms policy focusing on the political economy of military sales the evolution of U S arms export policy from John F Kennedy to Ronald Reagan and the institutional framework for arms export decision making Actual case studies of U S arms sales to Latin America Iran and the Middle East provide useful data in assessing the effectiveness of arms transfer programs in meeting U S foreign policy objectives The author also rigorously examines trouble spots in arms policy the transfer of arms making technology to Third World arms producers the relationship between arms transfers and human rights and the enforcement of arms embargoes on South Africa Chile and other pariah regimes Klare also compares the U S record on arms transfers to the experiences of other major arms suppliers the Soviet Union and the big four European nations France Britain the former West Germany and Italy Concluding with a reasoned carefully drawn proposal for an alternative arms export policy Klare vividly demonstrates the need for cautious restrained and sensitive policy **Reflections On International Relations & Politics & History & Law**
