Army Biometric Applications Identifying And Addressing Sociocultural Concerns:

Army Biometric Applications John D. Woodward, Katharine Watkins Webb, Elaine M. Newton, Melissa A. Bradley, David Rubenson, 2001-08-20 Every human possesses more than one virtually infallible form of identification Known as biometrics examples include fingerprints iris and retinal scans hand geometry and other measures of physical characteristics and personal traits Advances in computers and related technologies have made this a highly automated process through which recognition occurs almost instantaneously With concern about its information assurance systems and physical access control increasing the Army has undertaken an assessment of how it can use biometrics to improve security efficiency and convenience This report examines the sociocultural concerns that arise among soldiers civilian employees and the general public when the military mandates widespread use of biometrics The authors see no significant legal obstacles to Army use of biometrics but recommend that the Army go beyond the provisions of the Privacy Act of 1974 to allay concerns related to this emerging technology This report should be of interest to those responsible for access control as well as anyone concerned about privacy and technology issues *Army Biometric Applications. Identifying and Addressing Sociocultural Concerns*, 2001 The U S Army has a growing need to control access to its systems in times of both war and peace In wartime the Army's dependence on information as a tactical and strategic asset requires the Army to carefully control its battlefield networks From logistics flows to intelligence on enemy forces the Army depends on confining access to its data to authorized personnel This need for access control is also critical at the weapon system level Access control issues are important to the peacetime Army because improving the efficiency of peacetime operations including controlling access to facilities computer systems and classified information depends on fast and accurate identification The Army also operates a vast set of human resource services involving health care retiree and dependent benefits and troop support services These services create the need for positive identification to prevent fraud and abuse *Army Biometric Applications. The Economics of Financial and Medical Identity Theft L. Jean Camp, M. Eric Johnson, 2012-03-21 Financial identity theft is well understood with clear underlying motives Medical identity theft is new and presents a growing problem The solutions to both problems however are less clear The Economics of Financial and Medical Identity Theft discusses how the digital networked environment is critically different from the world of paper eyeballs and pens Many of the effective identity protections are embedded behind the eyeballs where the presumably passive observer is actually a fairly keen student of human behavior The emergence of medical identity theft and the implications of medical data privacy are described in the second section of this book The Economics of Financial and Medical Identity Theft also presents an overview of the current technology for identity management The book closes with a series of vignettes in the last chapter looking at the risks we may see in the future and how these risks can be mitigated or avoided
