practice of science and perhaps on our everyday life This accessible book gives a new detailed and elementary explanation of the Godel incompleteness theorems and presents the Chaitin results and their relation to the da Costa Doria results which are given in full but with no technicalities Besides theory the historical report and personal stories about the main character and on this book's writing process make it appealing leisure reading for those interested in mathematics logic physics philosophy and computer sciences See also <http://www.youtube.com/watch?v=REy9noY5Sg8> With the Possum and the Eagle Ralph H.
