Thomson,2019-10-01 Whether inscribed in physical media projected on surfaces or viewed on digital devices we find ourselves constantly inundated with streams of visual data Yet we know surprisingly little about how these images are made especially in journalistic contexts where representations are long lasting and where repercussions can be dramatic To See and Be Seen considers some of the ideological aesthetic pragmatic institutional cultural commercial environmental and psychological forces that consciously or otherwise shape the production of news images and subsequently influence their reception T J Thomson examines the expectations experiences and reactions of those depicted by visual journalists and considers other relevant factors how do everyday people perceive cameras and those who operate them How are identities visually represented and presented to different audiences And how does the physical and the socially constructed environment shape those depictions The results of Thomson s research provide one of the first empirical and real time glimpses into the experience of being in front of a journalist s lens To See and Be Seen enables us to understand the stories behind images by considering the environment in which such images are made the exchange if one occurred between the camera wielding observer and the observed the identities of both parties and how they react to the representations that are created To See and Be Seen is the winner of the National Communication Association s 2020 Diane S Hope Book of the Year Award NCA reviewers called the book a signature achievement in understanding the process of media production and the ethics of photojournalism *The Causes and Behavioral Consequences of Disasters* Sasha Rudenstine,Sandro Galea,2011-09-18 The Causes and Behavioral Consequences of Disasters brings a public health perspective to the literature reflecting the increasing importance of the field in both disaster preparedness and disaster response Arguing that a disaster is not only the event but its aftermath as well the authors apply salient local content to the study of scenarios ranging from the Cuzco Peru earthquake of 1950 to the Columbine school shooting the Oklahoma City bombing and 9 11 These case studies form the basis for models of vulnerabilities to disasters and population behavior following disasters illustrating how careful pre event planning and coordinated post event response strategies can minimize the initial damage and negative aftereffects The Causes and Behavioral Consequences of Disasters will further professional discussion and understanding among a wide range of professionals and students across public health mental health education health administration and policy social work and the social sciences **Crash prevention and protection challenges for all road users** Yong Han,Koji Mizuno,Robert Thomson,Bingbing Nie,2023-04-27 **SPIN** ,1989-05 From

the concert stage to the dressing room from the recording studio to the digital realm SPIN surveys the modern musical landscape and the culture around it with authoritative reporting provocative interviews and a discerning critical ear With dynamic photography bold graphic design and informed irreverence the pages of SPIN pulsate with the energy of today's most innovative sounds Whether covering what's new or what's next SPIN is your monthly VIP pass to all that rocks One for the Road Barron H. Lerner, 2011-10-14 Don't drink and drive It's a deceptively simple rule but one that is all too often ignored And while efforts to eliminate drunk driving have been around as long as automobiles every movement to keep drunks from driving has hit some alarming bumps in the road Barron H. Lerner narrates the two strong and vocal sides to this debate in the United States those who argue vehemently against drunk driving and those who believe the problem is exaggerated and overregulated A public health professor and historian of medicine Lerner asks why these opposing views exist examining drunk driving in the context of American beliefs about alcoholism driving individualism and civil liberties Angry and bereaved activist leaders and advocacy groups like Mothers Against Drunk Driving campaign passionately for education and legislation but even as people continue to be killed many Americans remain unwilling to take stronger steps to address the problem Lerner attributes this attitude to Americans' love of drinking and love of driving an inadequate public transportation system the strength of the alcohol lobby and the enduring backlash against Prohibition The stories of people killed and maimed by drunk drivers are heartrending and the country's routine rejection of reasonable strategies for ending drunk driving is frustratingly inexplicable This book is a fascinating study of the culture of drunk driving grassroots and professional efforts to stop it and a public that has consistently challenged and tested the limits of individual freedom Why despite decades and decades of warnings do people still choose to drive while intoxicated One for the Road provides crucial historical lessons for understanding the old epidemic of drunk driving and the new epidemic of distracted driving **The Poet's Freedom** Susan Stewart, 2011-10-11 Why do we need new art How free is the artist in making And why is the artist and particularly the poet a figure of freedom in Western culture The MacArthur Award winning poet and critic Susan Stewart ponders these questions in The Poet's Freedom Through a series of evocative essays she not only argues that freedom is necessary to making and is itself something made but also shows how artists give rules to their practices and model a self-determination that might serve in other spheres of work Stewart traces the ideas of freedom and making through insightful readings of an array of Western philosophers and poets Plato Homer Marx Heidegger Arendt Dante and Coleridge are among her key sources She begins by considering the theme of making in the Hebrew Scriptures examining their account of a god who creates the world and leaves humans free to rearrange and reform the materials of nature She goes on to follow the force of moods sounds rhythms images metrical rules rhetorical traditions the traps of the passions and the nature of language in the cycle of making and remaking Throughout the book she weaves the insight that the freedom to reverse any act of artistic making is as essential as the freedom to create A book about the pleasures of making and thinking as means of

life The Poet's Freedom explores and celebrates the freedom of artists who working under finite conditions make considered choices and shape surprising consequences This engaging and beautifully written notebook on making will attract anyone interested in the creation of art and literature
