What Do Pictures Want? W. J. T. Mitchell, 2013-12-23 Why do we have such extraordinarily powerful responses toward the images and pictures we see in everyday life Why do we behave as if pictures were alive possessing the power to influence us to demand things from us to persuade us seduce us or even lead us astray According to W J T Mitchell we need to reckon

with images not just as inert objects that convey meaning but as animated beings with desires needs appetites demands and drives of their own What Do Pictures Want explores this idea and highlights Mitchell s innovative and profoundly influential thinking on picture theory and the lives and loves of images Ranging across the visual arts literature and mass media Mitchell applies characteristically brilliant and wry analyses to Byzantine icons and cyberpunk films racial stereotypes and public monuments ancient idols and modern clones offensive images and found objects American photography and aboriginal painting Opening new vistas in iconology and the emergent field of visual culture he also considers the importance of Dolly the Sheep who as a clone fulfills the ancient dream of creating a living image and the destruction of the World Trade Center on 9 11 which among other things signifies a new and virulent form of iconoclasm What Do Pictures Want offers an immensely rich and suggestive account of the interplay between the visible and the readable A work by one of our leading theorists of visual representation it will be a touchstone for art historians literary critics anthropologists and philosophers alike A treasury of episodes generally overlooked by art history and visual studies that turn on images that walk by themselves and exert their own power over the living Norman Bryson Artforum

Lacan Reframed Steven Z. Levine,2011-07-26 Are your students baffled by Baudrillard Dazed by Deleuze Confused by Kristeva Other beginners guides can feel as impenetrable as the original texts to students who think in images Contemporary Thinkers Reframed instead uses the language of the arts to explore the usefulness in practice of complex ideas Short contemporary and accessible these lively books utilise actual examples of artworks films television shows works of architecture fashion and even computer games to explain and explore the work of the most commonly taught thinkers Conceived specifically for the visually minded the series will prove invaluable to students right across the visual arts Single handedly responsible for the influential and ominous notion of the gaze quoted by everybody yet fully understood by few Lacan s work can be difficult to grasp Going back to basics this introduction guides the reader through Lacan s key concepts by looking at art from the Mona Lisa through to Bridget Riley s paintings and by looking afresh at key works discussed by

Lacan himself from Holbein's famous *The Ambassadors* to Velazquez's *Las Meninas*. Making sense of Lacan's sometimes convoluted style, this highly readable introduction to one of the most frequently quoted thinkers also explores the reasons why human beings make and look at art.
