Digital Arts: Challenges and Opportunities at the Intersections between Arts, Society and Technology Marisa Gómez, 2019-07-22 This volume was first published by Inter Disciplinary Press in 2016 The present volume gathers a selection of texts that attempt to contribute to the critical reflection about digital arts and the social cultural context in which they arise However this book is not a systematic study about digital arts which thoroughly covers their history or their aesthetic and discursive principles Instead the five chapters hereby presented work as a sample of the multiple perspectives and approaches from which is possible to address this topic and to claim fresh insights for its further research The authors of this volume explore some of the challenges and possibilities offered by the intersections between art technology and society both for the fields of contemporary art and for the articulation of the social cultural models of the current Digital Age Thus digital arts are approached here not only as an object of study but also implicitly or explicitly as a tool for analyzing our contemporary reality Environmental Aesthetics J. Douglas Porteous, 2013-07-04 Environmental Aesthetics is a comprehensive introduction It includes a history of aesthetics discussing the psychology of human environment relations and artistic influences on the city and analysing the roles of policy and planning **AI and Humanistic Management** Michał Szostak, 2025-10-27 This book situated at the intersection of humanistic management aesthetics and artificial intelligence AI studies aims to explore how the emergence of AI driven solutions reshapes managerial paradigms alters human experiences

within organisations and redefines the values guiding leadership communication and organisational development. By adopting a cross disciplinary and multi paradigmatic perspective the volume seeks not only to identify the opportunities AI presents for enhancing human dignity and creativity at work but also to critically examine the risks of dehumanisation, aesthetic homogenisation and ethical displacement. In the contemporary discourse on management theory and practice the accelerated integration of AI technologies has initiated profound transformations that challenge the traditional humanistic foundations of organisational life. While AI is often perceived primarily through the lens of operational efficiency, cost optimisation and decision making enhancement, it also raises fundamental questions about the aesthetic, ethical and relational dimensions of management. In this context the book's critical research problem was formulated in the following manner: understanding how AI driven aesthetics influence the humanistic character of management under what conditions AI can serve human centred goals rather than eroding them, and what long term consequences AI integration may have for the emotional, ethical and aesthetic dimensions of organisational life. Addressing these issues is essential for developing management practices that harmonise technological advancement with the humanistic values of autonomy, authenticity, empathy and aesthetic experience.

The Age of Figurative Theo-humanism Franco Cirulli, 2015-05-11. This is a comprehensive integrated account of eighteenth and early nineteenth century German figurative aesthetics. The author focuses on the theologically minded discourse on the visual arts that unfolded in Germany circa 1754-1828 to critique the assumption that German romanticism and idealism pursued a formalist worship of beauty and of unbridled artistic autonomy. This book foregrounds what the author terms an Aesthetics of Figurative Theo-humanism. It begins with the sculptural aesthetics of Johann Joachim Winckelmann and Gottfried Herder, before moving on to Karl Philipp Moritz, Wilhelm Heinrich Wackenroder and Friedrich Schelling. The reader will discover how this aesthetic tradition, after an initial obsession with classical sculpture, chose painting as the medium more suited to the modern self's exploration of transcendence. This paradigm shift is traced in the aesthetic discourse of Friedrich Schlegel and Georg Wilhelm Friedrich Hegel. In this work the widespread prejudice that such aesthetics initiated a so-called Modern Grand Narrative of the Arts is deconstructed. One accusation directed at 18th century aesthetics has been that it realised into Art what had previously been a living, rich tissue of meaning; this work shows how Figurative Theo-humanism's attention to aesthetic values was never detached from deeper theological and humanistic considerations. Furthermore, it argues that this aesthetic discourse never forgot that it emerged from modern disenchantment; far from occluding the dimension of secularization, it draws poignant meaning from it. Anyone with an interest in the current debates about the scope and nature of aesthetics, philosophy of art, theology or religion will find this book of great interest and assistance.

The Activist Humanist Caroline Levine, 2023-10-17. An argument that humanists have the tools and the responsibility to mobilize political power to tackle climate change. As climate catastrophes intensify, why do literary and cultural studies scholars so often remain committed to the separation of aesthetic study from the nitty gritty of political

change In this thought provoking book Caroline Levine makes the case for an alternative view arguing that humanists have the tools to mobilize political power and the responsibility to use those tools to avert the worst impacts of global warming Building on the theory developed in her award winning book *Forms* Levine shows how formalist methods can be used in the fight for climate justice Countering scholars in the environmental humanities who embrace only modest gestures of care and who seem to have moved directly to mourning our inevitable environmental losses Levine argues that large scale practical environmental activism should be integral to humanists work She identifies three major infrastructural forms crucial to sustaining collective life routines pathways and enclosures Crisscrossing between art works and public works from urban transportation to television series and from food security programs to rhyming couplets she considers which forms might support stability and predictability in the face of growing precarity Finally bridging the gap between academic and practical work Levine offers a series of questions and exercises intended to guide readers into political action *The Activist Humanist* provides an essential handbook for prospective activist scholars

people user interfaces and buildings beautiful ugly handsome or elegant In addition to assessing our surroundings we prefer doing and making things in such a way as to promote aesthetic appeal We comb our hair we furnish and decorate we tune up our social media profiles and we create art for aesthetic reasons Aesthetic values guide our choices and decisions when we are shopping dining at the table spending our time on holiday voting in the polling booth or choosing a spouse But what actually is aesthetics Where and how does it exist Is everybody's taste as good as anybody's How does aesthetics relate to beauty or art How are the current megatrends such as digitalization molding aesthetics Aesthetics as Space explores the aesthetic aspects of our life in the 21st century and addresses the question above along with many others There is no all encompassing 21st century aesthetics rather it is a multi dimensional space of competing interpretations and ideas This book gives the reader tools for understanding these different approaches

Toward a Premodern Posthumanism Chad Augustine Córdova, 2025-04-15 Drawing on early modern French thought to free nature and aesthetics from metaphysical humanism What good is aesthetics in a time of ecological crisis Toward a Premodern Posthumanism Anarchic Ontologies of Earthly Life in Early Modern France shows that philosophical aesthetics contains unheeded potentialities for challenging the ontological subjection of nature to the human subject Drawing on deconstructive ecological and biopolitical thought Chad Córdova uncovers in aesthetics something irreducible to humanist metaphysics an account of how beings emerge and are interrelated responsive and even response able without reason or why This anarchic and atelic ontology recovered from Kant becomes the guiding thread for a new premodern trajectory of posthumanism Charting a path from Aristotle to Heidegger to today's plant thinking with new readings of Montaigne Pascal Diderot Rousseau and others along the way this capacious study reveals the untimely relevance of pre 1800 practices of writing science and art Enacting a multitemporal mode of reading Córdova offers a defense and illustration of the importance of returning to early modern texts as a way to rethink nature art ethics and politics in a time when these concepts are in flux and more contentious than ever
