International Humanitarian Law and the Changing Technology of War Dan Saxon,2013-03-15 Increasingly war is and will be fought by machines and virtual networks linking machines which to varying degrees are controlled by humans This book explores the legal challenges for armed forces resulting from the development and use of new military technologies automated and autonomous weapon systems cyber weapons non lethal weapons and advanced communications for the conduct of warfare The contributions each written by scholars and military officers with expertise in International Humanitarian Law IHL provide analysis and recommendations for armed forces as to how these new technologies may be used in accordance with international law Moreover the chapters provide suggestions for military doctrine to ensure continued compliance with IHL during this ever more rapid evolution of technology **Storm of Steel** Mary R. Habeck,2014-08-22 In this fascinating account of the battle tanks that saw combat in the European Theater of World War II Mary R Habeck traces the strategies developed between the wars for the use of armored vehicles in battle Only in Germany and the Soviet Union were truly original armor doctrines generally known as blitzkrieg and deep battle fully implemented Storm of Steel relates how the German and Soviet armies formulated and chose to put into practice doctrines that were

innovative for the time yet in many respects identical to one another As part of her extensive archival research in Russia Germany and Britain Habeck had access to a large number of formerly secret and top secret documents from several post Soviet archives This research informs her comparative approach as she looks at the roles of technology shared influences and assumptions about war in the formation of doctrine She also explores relations between the Germans and the Soviets to determine whether collaboration influenced the convergence of their armor doctrines Armaments and the Coming of War David Stevenson,1996 David Stevenson directs attention away from the Anglo German naval race towards the competition on land between the continental armies He analyses the defence policies of the Powers and the interaction between the growth of military preparedness and the diplomatic crises in the Mediterranean and the Balkans that culminated in the events of July August 1914 Global Design History Glenn Adamson, Giorgio Riello, Sarah Teasley, 2011-03-15 This book gathers together a number of leading design historians whose research points the way forward aiming to address and promote changes to design history Global Capitalism, Culture, and Ethics Richard A. Spinello, 2014-04-24 Selected as an Outstanding Academic Title by Choice Magazine in 2014 This book aims to deepen the student s understanding of the complex ethical challenges that businesses face in an increasingly globalized world As the world moves towards greater interdependence it has been demonstrated that globalization is linked to economic growth This raises a critical question as a key player in fostering economic growth how does the multinational corporation function as a moral agent Global Capitalism Culture and Ethics offers a sophisticated analysis of theoretical ethical issues such as universalism versus pluralism the connection between law and morality the validity of a corporate social agenda and the general parameters of moral responsibilities for multinational corporations With these foundational issues addressed the book proceeds to analyze a number of specific controversies such as the proper scope of political activism disinvestment environmental sustainability and responsible sourcing from low wage countries The analysis of globalization is not confined to a treatment of the moral obligations of multinational corporations but also reviews the history of global capitalism the interdependence between governments and multinational corporations and the beneficial and harmful effects of globalization on social welfare Weaving together themes from economics history philosophy and law this book allows the reader to appreciate globalization from multiple perspectives Its theoretical cogency and uncompromising clarity make it a rewarding read for students interested in issues of ethics and globalization Homeland Fascism Herman Schwendinger, Julia Schwendinger, 2016-06-23 It can t happen here This has been the prevailing sentiment about the possible emergence of fascism in the United States since the rise of international fascism in the 1930s Yet there are signs that it may already be happening and at the highest levels of government In their copiously researched and documented work the Schwendingers outline the structural transformations policies and practices that raise the prospect of fascist governance in the 21st Century United States They show that a homeland fascism has significant supports within the framework of American liberal democracy This is an important analysis in a context in which

concerns about fascist demagoguery and far right mobilization appear to be growing in the US and beyond German Disarmament After World War I Richard J. Shuster, 2006-09-27 German Disarmament After World War I examines the Allied disarmament of Germany and the challenges that such an enormous task presented to international efforts in enforcing the Treaty of Versailles In the twenty first century disarmament remains a critical issue for the International community This new book focuses on three key areas and lessons of Allied disarmament operations from 1920-31 the role and experience of international arms inspectors working amidst an embittered German populace the ramifications of the divergent disarmament priorities of the leaders of the disarmament coalition the effectiveness of united Allied policies backed by sanctions These major issues are examined within the overall context of the assessment of Allied disarmament operations in Germany While some historians perceive German disarmament as a failure this book argues that arms inspectors successfully destroyed Germany's ability to pose a military threat to European security This new study shows how the destructive legacy of war convinced the victorious nations especially Britain and France of the importance in minimizing German military strength French post war security concerns however were often faced with the unwillingness of Britain to enforce the totality of the military articles of the treaty German obstruction also influenced Allied disarmament policies German Disarmament After World War I examines the initial effectiveness of Allied disarmament efforts in Germany and explains how they ultimately disappeared through diverging conceptions of a post war world This book will be of great interest to all students of disarmament the interwar period and of military history modern European history and security studies *Big Business and the State* Raymond Vernon, 1974 The five country studies five industry studies and two more general papers are well integrated to make this one of the best books we have on industrial policy and the different patterns of government business relations developing in Western Europe Why the Axis Lost John Arquilla, 2020-03-13 The factors leading to the defeat of the Axis Powers in World War II have been debated for decades One prevalent view is that overwhelming Allied superiority in materials and manpower doomed the Axis Another holds that key strategic and tactical blunders lost the war from Hitler halting his panzers outside Dunkirk allowing more than 300 000 trapped Allied soldiers to escape to Admiral Yamamoto falling into the trap set by the U S Navy at Midway Providing a fresh perspective on the war this study challenges both views and offers an alternative explanation the Germans Japanese and Italians made poor design choices in ships planes tanks and information security before and during the war that forced them to fight with weapons and systems that were too soon outmatched by the Allies The unprecedented arms race of World War II posed a fundamental design challenge the Axis powers sometimes met but never mastered **A Force More Powerful** Peter Ackerman, Jack DuVall, 2015-12-01 This nationally acclaimed book shows how popular movements used nonviolent action to overthrow dictators obstruct military invaders and secure human rights in country after country over the past century Peter Ackerman and Jack DuVall depict how nonviolent sanctions such as protests strikes and boycotts separate brutal regimes from their means of control They tell

inside stories how Danes outmaneuvered the Nazis Solidarity defeated Polish communism and mass action removed a Chilean dictator and also how nonviolent power is changing the world today from Burma to Serbia **The Origins of World War I** Richard F. Hamilton, Holger H. Herwig, 2003-02-24 This work poses a straightforward yet at the same time perplexing question about World War I Why did it happen Several of the oft cited causes are reviewed and discussed The argument of the alliance systems is inadequate lacking relevance or compelling force The arguments of mass demands those focusing on nationalism militarism and social Darwinism it is argued are insufficient lacking indications of frequency intensity and process how they influenced the various decisions The work focuses on decision making on the choices made by small coteries in Austria Hungary Germany Russia France Britain and elsewhere The decisions made later by leaders in Japan the Ottoman Empire Italy the Balkans and the United States are also explored The final chapters review the basic causes once again An alternative position is advanced one focused on elites and coteries their backgrounds and training and on their unique agendas **Air University Library Index to Military Periodicals** ,1969 **Direction** ,1969

Transitional Justice and Corporate Accountability from Below Leigh A. Payne, Gabriel Pereira, Laura Bernal-Bermúdez, 2020-04-30 Examines when where why and how corporate accountability for past human rights violations in armed conflicts and authoritarian regimes is possible **Capital, Entrepreneurs and Profits** Richard Davenport-Hines, 2012-11-12 First Published in 1990 This volume starts with an introduction to the first works on business history since 1924 looking at the work of Francis Hyde in Liverpool and Harvard This is a collection of articles reprinted from the first 25 years of the journal Business History which was bi annually available until in 1981 when it increased to three issues The contributions demonstrate that the interpretation of business history has been very wide falling into the area of economic history **'Hamlet' and World Cinema** Mark Thornton Burnett, 2019-07-04 Reveals a rich cinematic history discussing Hamlet films from Africa Asia Europe Latin America and the Middle East
