Ulrich Füst

Art Architecture In Italy 1600 17 3vol:

The Architecture of Rome Ulrich Fürst, 1998 Architects and artists have always acknowledged over the centuries that Rome is rightly called the eternal city Rome is eternal above all because it was always young always in its prime Here the buildings that defined the West appeared over more than 2000 years here the history of European architecture was written The foundations were laid even in ancient Roman times when the first attempts were made to design interiors and thus make space open to experience as something physical And at that time the Roman architects also started to develop building types that are still valid today thus creating the cornerstone of later Western architecture In it Rome's primacy remained unbroken whether it was with old St Peter's as the first medieval basilica or new St Peter's as the building in which Bramante and Michelangelo developed the High Renaissance or with works by Bernini and Borromini whose rich and lucid spatial forms were to shape Baroque as far as Vienna Bohemia and Lower Franconia and also with Modern buildings of which there are many unexpected pearls to be found in Rome All this is comprehensible only if it is presented historically i.e. in chronological sequence and so the guide has not been arranged topographically as usual but chronologically This means that one is not led in random sequence from a Baroque building to an ancient or a modern one but the historical development is followed successively Every epoch is preceded by an introduction that identifies its key features This produces a continuous lavishly illustrated history of the architecture of Rome and thus at the same time of the whole of the West Practical handling is guaranteed by an alphabetical index and detailed maps whose information does not just immediately illustrate the historical picture but also makes it possible to choose a personal route through history

Rudolf Wittkower, 1999 **Art and Architecture in Italy, 1600-1750** Rudolf Wittkower, Joseph Connors, Jennifer Montagu, 1999-01-01 This classic survey of Italian Baroque art and architecture focuses on the arts in every center between Venice and Sicily in the early high and late Baroque periods The heart of the study however lies in the architecture and sculpture of the exhilarating years of Roman High Baroque when Bernini Borromini and Cortona were all at work under a series of enlightened popes Wittkower's text is now accompanied by a critical introduction and substantial new bibliography This edition will also include color illustrations for the first time This is the second book in the three volume survey

Architecture Of Rome Stefan Grundmann, 2007 Rome is where the history of European architecture was written The foundations were laid in ancient Roman times when the first attempts were made to design interiors which could be experienced as something physical Ancient Roman architects also started to develop building types that are still valid today thus creating the cornerstone of later Western architecture This guide has been arranged chronologically Every epoch is preceded by an introduction that identifies its key features This produces a continuous lavishly illustrated history of the architecture of Rome indeed the whole of the West The book includes an alphabetical index and detailed maps whose information does not just immediately illustrate the historical picture but also makes it possible to choose a personal route
