

## THE CAMBRIDGE SOCIAL HISTORY OF BRITAIN 1750–1950

Whilst in certain quarters it may be fashionable to suppose that there is no such thing as society, social historians have had no difficulty in finding their subject. The difficulty, rather, is that the advance of social history into every sphere of human activity and experience has occurred through such an outpouring of research and writing that it is hard for anyone but the specialist to keep up with the literature or grasp the overall picture. In these three volumes, as is the tradition in Cambridge Histories, a team of specialists has assembled the jigsaw of recent monographic research and presented an interpretation of the development of modern British society since 1750, from three complementary perspectives: those of regional communities, of the working and living environment, and of social institutions. Each volume is self-contained, and each contribution, thematically defined, contains its own chronology of the period under review. Taken as a whole they offer an authoritative and comprehensive view of the manner and method of the shaping of society in the two centuries of unprecedented demographic and economic change.

Volume 2, *People and their environment*, explores the questions of social structure, social mobility and class relations. Family and household, the social implications of demographic change, jobs, working and housing conditions, and family relations were all crucial elements in the shaping of group consciousness and form the main themes of this volume. Chapters on nutrition, patterns of food and drink consumption and leisure activities all contribute to a comprehensive overview of the way the social order has been changed.
