Barth,S. Trimbath,Glenn Yago,2006-04-11 Robert L Bartley Editor Emeritus The Wall Street Journal As this collection of essays is published markets regulators and society generally are sorting through the wreckage of the collapse in tech stocks at the turn of the millennium All the more reason for an exhaustive look at our last bubble if that is what we choose to call them We haven t had time to digest the lesson of the tech stocks and the recession that started in March 2001 After a decade though we re ready to understand the savings and loan bubble that popped in 1989 preceding the recession that started in July 1990 For more than a half century we can now see clearly enough the savings and loans were an accident waiting to happen The best insurance for financial institutions is diversification but the savings and loans were concentrated solely in residential financing What s more they were in the business of borrowing short and lending long accepting deposits that could be withdrawn quickly and making 20 year loans They were further protected by Regulation Q allowing them to pay a bit more

for savings deposits than commercial banks were allowed to In normal times they could ride the yield curve booking profits because long term interest rates are generally higher than short term ones This world was recorded in Jimmy Stewart s 1946 film It s a Wonderful Life

Logemann,2012-11-28 In the years that followed World War II both the United States and the newly formed West German republic had an opportunity to remake their economies Since then much has been made of a supposed Americanization of European consumer societies in Germany and elsewhere Arguing against these foggy notions Jan L Logemann takes a comparative look at the development of postwar mass consumption in West Germany and the United States and the emergence of discrete consumer modernities In Trams or Tailfins Logemann explains how the decisions made at this crucial time helped to define both of these economic superpowers in the second half of the twentieth century While Americans splurged on private cars and bought goods on credit in suburban shopping malls Germans rebuilt public transit and developed pedestrian shopping streets in their city centers choices that continue to shape the quality and character of life decades later Outlining the abundant differences in the structures of consumer society consumer habits and the role of public consumption in these countries Logemann reveals the many subtle ways that the spheres of government society and physical space define how we live
