Zero, the Story of Japan's Air War in the Pacific - As Seen by the Enemy Martin Caidin,2012-04-25 This is the thrilling saga of war in the air in the Pacific Theater of Operations during World War II told from the Japanese point of view It is the story of the men who created led and fought in the deadly Zero fighter plane In their own words Jiro Horikoshi who designed the Zero Masatake Okumiya leader of many Zero squadrons and Saburo Sakai Japan s leading surviving fighter ace as well as many other men tell the inside story of developing the Zero and Japan s air force They tell what it felt like to bomb American ships and to shoot down American airplanes and then of their shock when

the myth of invincibility was shattered by the new Lightning Hellcat and Corsair fighters They tell of the fight against the growing strength of a remorseless American enemy and how in desperation the Japanese High Command ordered the creation of deadly suicide squadrons the Kamikaze And finally they reveal their reaction to the dropping of the atomic bombs on Hiroshima and Nagasaki **Major Fleet-Versus-Fleet Operations in the Pacific War, 1941-1945** Milan N.

Vego,2016 A detailed study of three major naval operations of World War II These three initiated by imperial Japan took place in the Pacific and resulted in the battles of the Coral Sea Midway Aleutians and the Philippine Sea All the cases provide ample background on the geographic and strategic context of the operations as well as an account of the unfolding of the action utilizing much primary source material in especially American and Japanese archives Provided by publisher **South Pacific Air War Volume 3** Michael John Claringbould,Peter Ingman,2019-08 This third volume chronicles aerial warfare in the South Pacific during the critical months of May and June 1942 It can be read alone or as part of a trilogy that spans the first six months of the Pacific War and culminates in the Battle of the Coral Sea In early May 1942 the Japanese launched Operation MO a complex plan that involved the seizure of Tulagi and Port Moresby Within the context of an ongoing regional war waged by land based air forces opposing fleet carriers were drawn into conflict for the first time in history The result was the Battle of the Coral Sea resulting in the loss of the USS Lexington and the withdrawal of the remaining American carrier The orthodox view of Coral Sea is of an Allied victory whereby the Japanese were forced to abandon their plan to capture Port Moresby However the authors make a compelling argument that the Japanese capacity to mount the invasion was largely intact and it was a serious error by their rigid and hierarchical command structure to postpone the invasion at this critical time Following the Coral Sea battle the bloody aerial campaign continued in earnest between the land based air forces This resembled something of a slugfest between the opposing bases of Lae and Port Moresby just one hour s flying time apart The Allied offense was waged by American B 17 Flying Fortress B 25 Mitchell and B 26 Marauder bombers shuttling up from Australia Protecting their critical base at Port Moresby were a few hard battling P 39 Airacobra squadrons which suffered an astounding loss rate during this period On the Japanese side their formations of Betty and Nell bombers regularly pounded Moresby and by June had begun targeting its vulnerable harbor These were protected by the wide ranging Zero fighters of the famed Tainan Kokutai whose fighter pilots were amongst the best and most experienced to be found on any front during the Second World War Never before has this campaign been chronicled in such detail with Allied accounts matched against Japanese records and supported by the most accurate artwork ever produced of this era Both authors are uniquely qualified to tell this story Raised in Port Moresby Michael Claringbould is a globally acknowledged expert on the New Guinea conflict and both Japanese and USAAF aviation of this period Peter Ingman is an acclaimed military history author specializing in the early part of the Pacific War **The Early Air War in the Pacific** Ralph F.

Wetterhahn,2019-11-29 During the first 10 months of the war in the Pacific Japan achieved air supremacy with its carrier and

land based forces But after major setbacks at Midway and Guadalcanal the empire's expansion stalled in part due to flaws in aircraft design strategy and command This book offers a fresh analysis of the air war in the Pacific during the early phases of World War II Details are included from two expeditions conducted by the author that reveal the location of an American pilot missing in the Philippines since 1942 and clear up a controversial account involving famed Japanese ace Saburo Sakai and U S Navy pilot James Pug Southerland Survival in the South Pacific Robert Richardson,2024-09-30 This account of oft forgotten aspects of the war that is also a powerful survival story is highly recommended for the casual reader of military history as well as the serious scholar of the Pacific war Journal of America's Military Past In September 1943 as America began advancing from its foothold on Guadalcanal a young American airman was lost in heavy weather over the South Pacific on what was expected to be a routine flight In examining that loss and the events leading up to a rescue attempt on an island in the South Pacific and bringing together societies utterly alien to each other Survival in the South Pacific brings together the big themes of the Pacific War Lieutenant Leonard Richardson and his comrades had been swept from their homes across America trained at speed for war and dispatched to one of the remotest places on the globe American war plans in place when Pearl Harbor was attacked poorly reflected the capabilities of its military and the limits imposed by America's far flung and indefensible territories The Germany First policy had resulted in a deeply uncertain future for forces in the South Pacific and Australia the United States was unprepared for the global war that came to it in late 1941 even as the pipeline of men and materiel began to fill Young Allied and Japanese aviators sailors and soldiers were not the only ones thrown into the swirling maelstrom of war that had engulfed the Pacific the indigenous islanders were also immersed in a new reality In bringing together individual stories of men at war this book gives a new perspective on the Pacific War **A - Airports** British Library,2012-05-21 No detailed description available for A Airports X-Com Interceptor David Ellis,1998 Combining the classic style of the original X COM with a Wing Commander style space simulation Interceptor takes the series to the next level fighting the Sectoids in outer space Complete mission briefings and maps are featured in this guide which was written by the lead designer of the game *Piercing the Fog: Intelligence and Army Air Forces Operations in World War II* , **PC Mag** ,1998-11-17 PCMag.com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology *The Turn of the Tide in the Pacific War* Sean M. Judge,Jonathan M. House,2018-03-15 Midway through 1942 Japanese and Allied forces found themselves fighting on two fronts in New Guinea and the Solomon Islands These concurrent campaigns conducted between July 1942 and February 1943 proved a critical turning point in the war being waged in the Pacific as the advantage definitively shifted from the Japanese to the Americans Key to this shift was the Allies seizing of the strategic initiative a concept that Sean Judge examines in this book particularly in the context of the Pacific War The concept of strategic initiative in this analysis helps to explain why and how contending

powers design campaigns and use military forces to alter the trajectory of war Judge identifies five factors that come into play in capturing and maintaining the initiative resources intelligence strategic acumen combat effectiveness and chance all of which are affected by political will His book uses the dual campaigns in New Guinea and the Solomon Islands as a case study in strategic initiative by reconstructing the organizations decisions and events that influenced the shift of initiative from one adversary to the other Perhaps the most critical factor in this case is strategic acumen without which the other advantages are easily squandered Specifically Judge details how General Douglas MacArthur and Admiral Chester Nimitz in designing and executing these campaigns provided the strategic leadership essential to reversing the tide of war whose outcome Judge contends was not as inevitable as conventional wisdom tells us The strategic initiative once passed to American and Allied forces in the Pacific would never be relinquished In its explanation of how and why this happened *The Turn of the Tide in the Pacific War* holds important lessons for students of military history and for future strategic leaders

The War for the Seas Evan Mawdsley, 2019-09-24 This impeccable myth busting study of WWII maritime operations sheds new light on the conflict with sharp analysis and an international perspective *The Sunday Times* UK Command of the oceans was crucial to winning World War II By the start of 1942 Nazi Germany had conquered mainland Europe and Imperial Japan had overrun Southeast Asia and much of the Pacific How could Britain and distant America prevail in what had become a war of continents In this definitive account Evan Mawdsley traces events at sea from the first U boat operations in 1939 to the surrender of Japan He argues that the Allied counterattack involved not just decisive sea battles but a long struggle to control shipping arteries and move armies across the sea Covering all the major actions in the Atlantic and Pacific oceans as well as those in the narrow seas this book interweaves for the first time the endeavors of the maritime forces of the British Empire the United States Germany and Japan as well as those of France Italy and Russia

South Pacific Air War Volume 4 Peter Ingman, Michael Claringbould, 2020-12 Volume Four chronicles aerial warfare in the South Pacific in the critical period between 19 June and 8 September 1942 It can be read alone or as a continuation of the first three volumes that spanned the first six months of the Pacific War culminating in the Battle of the Coral Sea Unlike the previous three volumes no aircraft carriers appeared in New Guinea waters Instead the air war was fought solely by land based air units This was in the face of an increasingly complex strategic situation that saw the Japanese land at both Buna and Milne Bay For the first time airpower in the theater was tasked to support the land forces of both sides which became engaged in a bloody struggle in the mountains of Papua and then the narrow muddy quagmire of Milne Bay Two veteran Japanese air groups the Tainan and No 4 Kokutai continued their Herculean struggle against mounting Allied opposition In the face of continued attrition Japanese pilots had many notable successes including several coveted aerial victories against B 17s Then from August a plethora of fresh Japanese units arrived in theatre including the No 2 No 6 Chitose Misawa and Kisarazu Kokutai USAAF P 39s and RAAF P 40Es responded with low level close support missions and B 25s B 26s and B 17s ramped

up an unrelenting bombing campaign Towards the end of the period A 20A strafers made their combat debut portending a radical blueprint for future attack tactics in the theater Never before has this campaign been chronicled in such detail with Allied accounts matched against Japanese records for a truly factual account of the conflict **World War II in the Pacific**
