Neuropsychology, Neuropsychiatry, and Behavioral Neurology Rhawn Joseph, 2013-04-17. This book is written for the clinician, students, and practitioners of neuropsychology, neuropsychiatry, and behavioral neurology. It has been my intent throughout to present a synthesis of ideas and research findings. I have reviewed thousands of articles and research reports and have drawn extensively from diverse sources in philosophy, psychology, neurology, neurosurgery, neuropsychiatry, physiology, and neuroanatomy in order to produce this text. Of course, I have also drawn from my own experience as a clinician and research scientist in preparing this work and in this regard, some of my own biases and interests are represented. I have long sought to understand the human mind and the phenomena we experience as conscious awareness. After many years of studying a variety of Western and Eastern psychologists and philosophers including the Buddhist, Taoist, and Hindu philosophical systems, I began while still an undergraduate student to formulate my own theory of the mind. I felt though that what I had come upon were only pieces of half the puzzle. What I knew of the brain was minimal. Indeed, it came as quite a surprise when one day I came across the journal *Brain* as I was browsing through the periodicals section of the library. I was awed. An entire journal devoted to the brain was quite a revelation. Nevertheless, although intrigued by the possibilities, I resisted.

The Neuropsychology of Epilepsy Thomas L. Bennett, 2013-06-29 This was an exciting project to work on and I attempted to obtain a broad sampling of current research on the neuropsychology of epilepsy Because the emphasis of the book takes a neuropsychological perspective on epilepsy the coverage is not redundant with previous texts on this topic The book is organized around three themes although individual chapters certainly often extend beyond the part in which they are located The three major topics are the nature of epilepsy cognitive and emotional consequences of epilepsy and treatment approaches to epilepsy and outcome In Part I following a historical overview of epilepsy in Chapter 1 by Sandra D Haynes and me Gerald C McIntosh presents a conceptualization of the epilepsies from a neurologist's perspective The characteristics of seizure types are discussed and the etiology of secondary epilepsies is described Epileptic syndromes are considered McIntosh outlines clinical seizure patterns associated with seizures originating from different cortical regions
