Educational Innovation in Economics and Business V Lex Borghans,Wim H. Gijssels,Richard G. Milder,John E. Stinson,2005-12-17 The workplace is changing drastically these days As a consequence of the Information and Communication Technology ICT revolution new economic activities emerge the production process changes people use different communication tools and organizational structures are adjusted All these changes relate to the heart of business and economics and there is no doubt that they will also influence education in these areas Of course ICT provides new technologies to facilitate learning but a changing workplace also requires a renewed focus within the curriculum of economics and business education If ICT is leading to profound change in the workplace is innovation then only a matter of introducing more technology in education Unfortunately this is not necessarily true The translation of changes in the workplace into an improved curriculum requires serious analysis of the essence of the changes at the work place and the way technology may enable student learning For example relevant knowledge is changing faster and faster Does this mean that we have to adopt the curriculum faster and faster Perhaps not as students will have a labor market career of 30 or 40 years Focusing on today s knowledge even if it is very up to date loses more and more value if the life cycle of knowledge becomes shorter Increased speed of change also implies a decrease in the value of knowing all these things Educational Innovation in Economics and Business V L. Borghans,2000 The Information and Communication Technology revolution results in profound changes to the heart of business and economics Changes in the workplace new communication technology new organizational structures and new production technologies force business educators to renew their focus on the curricula of business schools There is no doubt these changes influence business education and instructional technology But change will go far beyond the mere introduction of technology in the classroom Alliances between the corporate world and business education are no longer fictitious but are necessary to establish stronger bonds between educational systems and the workplace The fifth volume in the series Educational Innovation in Economics and Business contains a unique selection of articles addressing various issues on how business education should adapt to changing needs of the corporate world It is meant for educators in corporate training centers and for teachers in further and higher education *Ethnic Relations and Schooling* Sally Tomlinson,Maurice Craft,1995-01-01 A sound knowledgeable and balanced account of the issues affecting ethnic relations in primary and secondary schools in the 1990s Addressed to teachers governors parents local and central government this book reflects the tensions and pressures felt in schools today and points to the policies and practices working for improvement This book is greatly needed since much of the earlier literature in this field is now outdated

Murder in Our Midst Romaine Smith Fullerton,Maggie Jones Patterson,2021 As immigration technological change and globalization reshape the world journalism plays a central role in shaping how the public adjusts to moral and material

upheaval This in turn raises the ethical stakes for journalism In short reporters have a choice in the way they tell these stories They can spread panic and discontent or encourage adaptation and reconciliation In *Murder in Our Midst* Romyne Smith Fullerton and Maggie Jones Patterson compare journalists crime coverage decisions in North America and select Western European countries as a key to examine culturally constructed concepts like privacy public public right to know and justice Drawing from sample news coverage national and international codes of ethics and style guides and close to 200 personal interviews with news professionals and academics they highlight differences in crime news reporting practices and emphasize how crime stories both reflect and shape each nation s attitudes in unique ways *Murder in Our Midst* is both an empirical look at varying journalistic styles and an ethical evaluation of whether particular story telling approaches do or do not serve the practice of democracy
