ZUM '98: The Z Formal Specification Notation Jonathan P. Bowen, Andreas Fett, Michael G. Hinchey, 1998-09-16 1 In a number of recent presentations most notably at FME 96 one of the foremost scientists in the field of formal methods C A R Hoare has highlighted the fact that formal methods are not the only technique for producing reliable software This seems to have caused some controversy not least amongst formal methods practitioners How can one of the founding fathers of formal methods seemingly denounce the field of research after over a quarter of a century of support This is a question that has been posed recently by some formal methods skeptics However Prof Hoare has not abandoned formal methods He is reiterating 2 albeit more radically his 1987 view that more than one tool and notation will be required in the practical industrial development of large scale complex computer systems and not all of these tools and notations will be or even need be formal in nature Formal methods are not a solution but rather one of a selection of techniques that have proven to be useful in the development of reliable complex systems and to result in hardware and software systems that can be produced on time and within a budget while satisfying the stated requirements After almost three decades the time has come to view formal methods in the context of overall industrial scale system development and their relationship to other techniques and methods We should no longer consider the issue of whether we are pro formal or anti formal but rather the degree of formality if any that we need to support in system development This is a goal of ZUM 98 the 11th International Conference of Z Users held for the first time within continental Europe in the city of Berlin Germany **EuroPLOP 2009 Proceedings** Allan Kelly, 2011

Practice-Driven Research on Enterprise Transformation Frank Harmsen, Frank Schalkwijk, Joseph Barjis, Sietse Overbeek,2010-11-01 The PRET working conferences are set up as a one day event in such a way that it attracts an audience from both industry and academia PRET 2010 was a continuation of the PRET 2009 working conference which was organized as the industrial track at the 2009 CAiSE conference The PRET 2010 working conference was organized as part of the enterprise engineering week and was co located with PoEM 2010 and TEAR 2010 in Delft The statement that modern day enterprises are in a constant state of ux is in 2010 even more true than it was in 2009 The markets are in a state of confusion and seem to have no direction at all as they are swinging back and forth depending on often contradictory signals and economic forecasts As a consequence enterprises be they private businesses government

departments or other organizations are taking their measures Restructuring divesting proving performance and merging are among the usual transformation activities that enterprises conduct to provide answers to the ever challenging demands that are put on them In addition to the tricky economic situation developments like globalization rapid technological advancement aging and the changing mindset of customers contribute to a situation in which nothing is certain anymore and in which change is the only constant PRET approaches these developments and the impact they have on enterprises from a holistic enterprise engineering perspective
