Congress. House. Committee on Energy and Commerce. Subcommittee on Commerce, Trade, and Consumer Protection, 2002 The Economics and Politics of Accounting Christian Leuz, Dieter Pfaff, Anthony Hopwood, 2005-09-15 Accounting and the role of accountants has permeated the modern societies For the most part we have accepted the impartiality and objectivity of accounting and not recognized how accounting systems are embedded in a country's economic and legal framework much of which is in turn shaped by political processes This web of interactions results in complex economic and political questions which require accounting researchers to focus on several related trends information economics regulatory economics sociology and political science Although considerable progress has been made in the field of accounting many fundamental questions are still subject to debate In this book leading international scholars address a number of important questions What is the role of accounting in security valuation decision making and contracting What can we learn from economics based research in accounting What is the role of auditing and how can accounting standards be enforced What are the cost and benefits of accounting and disclosure regulation What is the role of accounting in society How does lobbying affect the political process of standard setting What are the consequences of the internationalization of standard setting This seminal book will be of interest to academics researchers and graduate students of Accounting Finance Business Studies Sociology and Political Economy **Political Standards** Karthik Ramanna, 2015-11-09 Prudent verifiable and timely corporate accounting is a bedrock of our modern capitalist system In recent years however the rules that govern corporate accounting

have been subtly changed in ways that compromise these core principles to the detriment of the economy at large These changes have been driven by the private agendas of certain corporate special interests aided selectively and sometimes unwittingly by arguments from business academia With Political Standards Karthik Ramanna develops the notion of thin political markets to describe a key problem facing technical rule making in corporate accounting and beyond When standard setting boards attempt to regulate the accounting practices of corporations they must draw on a small pool of qualified experts but those experts almost always have strong commercial interests in the outcome Meanwhile standard setting rarely enjoys much attention from the general public This absence of accountability Ramanna argues allows corporate managers to game the system In the profit maximization framework of modern capitalism the only practicable solution is to reframe managerial norms when participating in thin political markets Political Standards will be an essential resource for understanding how the rules of the game are set whom they inevitably favor and how the process can be changed for a better capitalism
