Waetjen, 2014-02-25 Endorsements Waetjen offers us an illuminating reading of Mark's Gospel that was forged out of his own experience in the Third World Working from a fresh translation that lays bare the Markan style Waetjen traces the stark conflict between the new ordering of power announced by Jesus and the tenacious domination of the ruling elite in Israel's agrarian society This innovative application of the sociology of millennialism to the phenomenon of Mark's narrative world is loaded with insights that will be of interest to readers at every level David Rhoads Lutheran School of Theology Chicago

The Healer's Power Howard Brody, 1992-01-01 Although the physician's use and misuse of power have been discussed in the social sciences and in literature they have never been explored in medical ethics until now In this book Dr Howard Brody argues that the central task is not to reduce the physician's power as others have suggested but to develop guidelines for its use so that the doctor shares with the patient both information and the responsibility for deciding on appropriate treatment Dr Brody first reviews literary works dealing with medical power from Dostoevsky's *The Grand Inquisitor* to stories by William Carlos Williams Vonda McIntyre and Richard Selzer These works he shows reveal the healers ambivalence over their own power and patients fears of the abuse of power Dr Brody then points out important but neglected ethical issues that emerge from an analysis of power such as the tension between care of individual patients and the pressures of the doctor's workload the rescue fantasy that impels some physicians to extraordinary lengths to save a life and the economic system which rewards surgeons and other specialists more than it does physicians who spend time talking with patients about their problems He also shows how the perspective of shared power can shed new light on standard topics in medical ethics from informed consent and confidentiality to resource allocation and cost containment
